UR SEEDS are the BEsT that can be obtained anywhere, because we are as careful in our selection as it is possible for anyone to be, and are constantly on the lookout for the best of everything, but will not put on the market anything until it has been thoroughly tried and proved.
We do not advertise "cheap seeds," because the best seeds cannot be pint in competition with "cheap seeds;" but we sell
 cannot be obtained anywhere, as our constantly and rapidyy increasing trade does and will testify.
Our Seeds are AL. TIESTED thoroughly before being placed on the market.
HOW TO ORDER TO AVOID DELAY. All orders from unknown, correspondents should be accompanied with the cash

By writing out your order on the order sheet sent with each catalogue you will greatly facilitate

 the purchaser does not aceept the goods on these terms, they are at once to be returned.

## ASPARAGUS, 角ernan, 买quat

This is one of the earliest spring vegetables, and should be in universal use. Many persons think it is difficult to grow but we consider this a mistake, and believe it can be produced as cheaply and easily as any on the list. Sow the seed in the seed bed late in the fall or the early spring, as soon as the ground can be worked, in drills one foot apart, covering the seed about one inch deep. When the plants are four to five inches high, great care should be taken to keep

## DWVARF BUSH OR SNAP

## 1 quart will plant 100 feet of drill.

Add 8c. per pint, or 15c. per quart, on all Beans if to-be sent by mail.
Select light, warm soil, and plant when danger from frost is past in the spring, in drills 2 to $21 / 2$ feet apart, dropping the deep. A succession of sowings can be made from the first week in May until August.

WARDWELL'S KIDNEY WAX.

## DWVARF WVAX PODDED

## WARDWELL'S KIDNEY WAX BEAN.

This is one of the best wax sorts. The vines are remark ably vigorous, hardy and productive. The pods are very large, smooth, showy, tender, perfectly stringless and of unPint, 15c. Quart, 25c. Peck, \$1.50. Bushel, \$5.50.
NEW PENCIL POD WAX BEAN.-Very early and produc ive. Pods long, straight and handsome; color, light golden w; strong and vigorous bush. One of the best varieties.
Pint, 15c. Quart, 25c. Peck, \$1.50. Bushel, \$5.50. CURRIE'S RUSTPROOF BLACK WAX.-For earliness and freedom from rust it is at the head of the Wax Bean family. Habit, upright and robust, holding the pods well from the tiful color; quality not surpassed, and for productiveness it is unequaled. Pint, 15c. Quart, 25c. Peck, \$1.25. Bushel, \$4.75. IMPROVED RUSTPROOF GOLDEN WAX.-This is the earliest, handsomest and hardiest of all the Wax Beans. The Wax, much superior in quality, absolutely rustproof and sure to become the favorite Wax Bean; in fact, it has already gained great popularity with growers. Pint, 15c. Quart, 25c. Peck, \$1.50. Bushel, \$5.50.
GOLDEN-EYED WAX.-This Bush Bean is very early; the vine grows vigorously to about one and a half feet high, holding pods off the ground. The pods are handsome, long', straight and flat, remarkably free from rust. Pint, 15c. Quart, 25c. Peck, \$1.25. Bushel, \$4.75.
DAVIS' KIDNEY WHITE WAX.-Vigorous grower, bears abundantly; long, white, handsome pods, which are crisp and tender if gathered when young. Pint, 15c. Quart, 25 c. Peck, \$1.50. Bushel, \$5.00.

DWARE PROLIFIC BLACK W AX. - Yellow pod, a very superior sin ap sort,
ripening among ripening a mong and having the best characterisPint, 15c. Quart, Peck, $\$ 1.50$ Bushel, $\$ 5.00$.

## DWARF GREEN

 PODDEDEARLIEST MARKET. - This is well named, be-
DWARF PROLIFIC BLACK WAX.
bean in existence, and therefore very profitable to the market gardener, and desirable to the private gardener as well. The pods are long, broad, green and very showy, reaching maturity in 30 days from germination, and the habit of vine ery productive. Pint, 25c. Quart, 35e.
EXTRA EARLY BOUNTIFUL (Flat Green Pod).-A prolific and continuous bearer. The first in the spring, the last in the fall. Absolutely stringless, very tender, and
licious flavor. Pint, 15c. Quart, 25c. Peck, \$1.50.

BLACK VALENTINE.-This excellent extra early variety has perfectly round, straight pods of excellent quality. It is suitable both for early and late planting, being extremely hardy. A most desirable sort for the market gardeners, owing to its enormous yielding qualities, large and handsome appearance. Pt., 15c. Ot., 30c. Pk., \$1.50. Bus., \$5.00.

EXTRA EARLY REFUGEE.-It is similar in every respec to the ordinary Refugee, but is nearly two weeks earlier
is enormously prolific, and from its earliness is almost
tain to produce a crop, no matter how unfavorable the son; is rapidly becoming a fayorite sort, as it matures equally early with Red Valentine, and has that beautiful silvery reen color in pods that is so much desired. Pint, 15e. Quart, 20c. Peck, $\$ 1.25$. Bushel, $\$ 4.00$.

REFUGEE, OF 1000 TO 1.-A medium to late variety, very productive and largely grown for pickling; handsome and tender pods. Pint, 15c. Quart, 20c. Peck, \$1.25. Bu., \$4.00. EARLY MOHAWK.-Pint, 15c. Quart, 20e. Peek, \$1.25. Bushel, \$3.75.

DWARF HORTICULTURAL (Cherry).-A very green por-

ded sort, used as for shell bean, ant one of the finest in general use; long those who use a green state. Pt. 15c. Qt., 25c. Pk. BEST OF ALL. valuable the most podded sorts for family or market six. inches long very fleshy, suceulent, stringless and of rich flavor; are
produced early and abundantly. Pt., 15c. $\$ 1.50$. \$5.50 ${ }^{\$ 1.50 .}$

LONG YELLOW 6 WEEKS. - Very
Pint, 15e. Quart, 25c
Peck, $\$ 1.25$. Bus., $\$ 4.00$
G. \& T. CO.'S EXTRA EARLY RED VALENTINE.-Ten ays earlier than the ordinary Red Valentine Bean, and therefore the best for truckers and market gardeners. It is without doubt the very best and earliest green Snap Short Bean. The habit of the vine is dwarfed and very uniform. Color of pods light green, round, curved, succulent, prolific, continuing long in edible condition. Pt., 15c. Qt., 25e. Pk., $\$ 1.25$. Bu., $\$ 4.00$

EARLY RED VALENTINE.-Pint, 15c. Quart, 20c. Peek, \$1.00. Bushel, \$3.75.

BURPEE'S NEW STRINGLESS GREEN POD.-One of the earliest varieties, pods round and full, absolutely stringless, and of beautiful fleshy appearance; quality excellent. The only green-pod bean of which the pods never develop any strings. Pint, 15c. Quart, 25c. Peck, $\$ 1.50$. Bnshel, $\$ 5.00$.

GIANT STRINGLESS GREEN POD.-Resembles very much the old valentine. The plants are of strong growth, very productive; pods 5 inches long, light green, slightly curved, very meaty, brittle and stringless at all stages and of mild
flavor. Pint, 15c. Quart, 25c. Pedk, \$1.25. Businel oiver

WHITE MARROW
dry bean for winter use. Qt., 20c. Pk., \$1.10. Bus., \$4.00 as a
WHITE NAVY, or SMALL PEA BEAN - A Well
variety for field culture; very prolific. Quart, 20c. Peck, 81.00. Bushel, \$3.50.

## Bush Lima Beans <br> DREER'S BUSH LIMA.

Dwarf variety of Dreer's Tmproved Lima, which has been fixed in its character of a bush bean; very prolific, single plants of producing 150 to 200 pods. Equal in quality and tenLima. Pt., 15e.; at 30c. pk., \$1.75; bus., \$6.50. HENDERSON'S DWARF LIMA.
These are very valuable beles, and being so dwarf can be planted close to gether. They are very Pt., 15e.; qt., 30c.; pk. \$1.65; bus., \$6.00.
BURPEE'S BUSH LIMA. Bushes grow 18 to 20 inches high, stout growth and always erect, yet that each plant develops
into a magnificent circular bush 2 to 3 feet in diame. ter; an immense yielder, 200 handsome, large pods, well filled. Pt., $15 e . ; q t$.
$30 e . ;$ pk., $\$ 1.75$; bus., $\$ 5.50$. BURPEE'S QUARTER CEN'TURY BUSH LIMA. A strain of the above, but an improvement. About 10 days earlier. Pt., 25e.; qt., $40 \mathrm{e} . ; \mathrm{pk}$., $\$ 2.00$.

## POLE LIMA BEANS

FORD'S MAMMOTH POLE IIMA BEAN.-The pods grow to an average length of 8 inches, are produced in great clusters, with from 5 to 7 beans per pod of most excellent quality for using either green or dry. The vines grow vigorously, setting Pint., 15c.; quart, 30e.; peck, \$2.00; bushel, \$7.00.

EXTRA EARIY JERSEY LIMA.-This variety is two weeks earlier than other sorts; the pods are large and numerous, making it a very profitable sort to grow. Pint, 15e.; quart, 30c.; peck, $\mathbf{\$ 1 . 7 5}$; bushel, \$6.25.

SEIBERT'S LARGE EARLY,-A very early and pronfic strain of the Large Lima. The vines begin bearing pods considerably earlier than the regular strains of Large Limas. While the pods are only of medium length, they are well filled, containing 3 and 4 large, fleshy beans, which are extremely tender and fine in flavor. Pint, 15c.; quart, 30c.; peck, \$1.75; bushel, \$6.50.
EXTRA LARGE LIMA.-This is a splendid sort, and takes a leading place with growers, because of its many excellent qualities. As a shell bean surpasses all in DREER'S IMPROVED OR CHALLENGE POLE LIMA. dered by many growers superior to all others in quality and productiveness. When green it is as large as the Large Lima, thicker, sweeter and more tender and nutritious, remaining green in the pod for a long time after maturing. Pint, 15e. quart, 30c.; peck, \$1.75; bushel, \$6.75.

KING OF THE GARDEN LIMA.-This bean has met with enormous sales the past few seasons. They are vigorous growers, setting their beans early at botton than the ordinary Lima, bearing pods 5 to 7 inches long, in clusters of 4 and 5 , with 5 or 6 beans in a pod. Pint, 15c.; quart, 30e.; peck, $\mathbf{\$ 1 . 7 5}$; bushel, \$6.75.

LARGE WHITE LIMA.-One of the best of the pole beans, either green or dry Pint, 15c.; quart, 30e.; peck, \$1.75; bushel, \$6.25.

CAROLINA, OR SIEVA.-A seedling variety of Large White Lima, with small pods, usually about 2 inches lon

## POLE BEANS

Set the poles 3 or 4 feet apart and plant 6 to 8 beans, with the eyes downward, around each pole, thinning to 4 healthy plants when they are up. They require the same soll and treatment as the dwarf varieties, with the exception that they erave stronger soll and do best in a sheltered location.

MARYLAND WHITE, This new White Pole Bean is destined to take its place as one of the best beans ever grown for general purposes. Its thick, meaty, green pods are very tender, rich in flavor, and produced in great abundance. It is equally extent for a few years, and those who have grown it once want it again. Pint, 15e.; quart, 30e.; peck, $\$ 2.00$; bushel, $\mathbf{8 7 . 0 0}$.

LAZY WIFE.-Large pale green pods, very thick meated, stringless, rich, tender and buttery; ripens early; clings well to the pole; enormously productive; splendid KENTUCKY WONDER, OR OLD HOMESTEAD.-A very prolific bushel, \$6.25.
, aching 9 , Wow in length, nearly round when young prolific sort, bearing its pods in large clusters; pods green, often SPECKLED HORTICULTURAL, OR WREN'S EGG.-An old favorite for both snap-shorts and dry beans. Pint, 15e.; quart $25 \mathrm{c} \cdot \mathrm{F}$ peck, 81.50 ; bushel, $\$ 5.00$.

WHITE CHERRY.-Great favorite. Pint, 15e.; quart, 30e; peck, \$1.75; bushel, \$6.50.
CREASE BACK, OR FAT HORSE.-A Well-known and highly esteemed Southern variety; very productive; forms full
sovithen fleshy; stringless and distinctly creased along its back, hence its name. Pt., 15c.; qt., 30c.; pk., \$1.75; bus., 86.50.
SOUTHERN PROLIFIC.-A Splendid, Vigorous and productive variety, Pods in clusters, succulent and delicious; matures early; continues bearing until frost. Pint, 15c.; quart, 30e.; peck, \$1.50; bushel, \$6.00.
SPECKLED CUT-SHORT, OR CORN-HILL.-An old variety, very popular for plant
rop without the use of poles; vines medium, with dark-colored, smooth leaves planting among corn, and will give a good 15e.; quart, 25e.; peck, 81.25; bushel, \$4.50.

DUTCH CASE. KNIFE.-Vines moderately vigorous, climbing well; may be used for a corn-hill bean; leaves large,

ONE OUNCE OF SEED TO 100 YARDS OF ROW.

## CABBAGE

(1)erman, Fopffohl.

Cfrom must have good land. Plow deep and fertilize liberally, as it is a strong feeder. The early sor from 18 inches to feet in the rows, the larger varieties fo buy cheap Cabbage Seed, wurs are American from the best stock in the country. For early use, sow in a hotbed in Februsry or March, and set out to a cold frame as soon as large enough. In April the plants may be set out in the rows. For late crop, sow in nursery bed in May or June, and transplant as soon as the plants are 5 or 6 inches high. The ground should be thoroughly cultivated every week until the plants meet in the rows.
KING OF EARLIES, Our own introduction; American grown. An extra early variety, fully a week ahead of all other varieties in forming marketable heads; the heads are tall and slim and of rather small size, formed like a Wakefield Habit, vigorous; short stem and proof against sun. Pkts., 5c. and 10e. Oz., 20c. $1 / 4 \mathrm{lb}$., 40c. Lb., \$1.50.
EXTRA EARLY EXPRESS, Heads are comparatively thicker and less pointed than Jersey Wakefield and slightly earlier Head softer, but stands shipping better. Pkts, 5c, and 10c. Oz., 20c. $1 / 4 \mathrm{lb}$., 40 c . Lb., \$1.50.
EARLY WINNINGSTADT.-Head large, cone-shaped and solid. An old and popular sort. Pkts., 5e. and 10c. Oz., 15e. 1/4 1b., 40c. Lb., \$1.25.

## Early Dwarf Flat Dutch

American Grown.
An old standard variety which stands the sun and produces fine, large heads, coming in soon after Oz., 20c. $1 / 4 \mathrm{lb}$., 50e. Lb., $\$ 1.50$.

## HENDERSON'S EARLY

 SPRINGAn extra early round-headed type. Pkt., 10c. Oz., 20e. $1 / 4 \mathrm{lb} .$, soc. Lb., \$1.75.

LARGE EARLY YORK.American Grown. - One of the earliest. Forms a medium size.
pointed head. Pkts., 5e. and 10e. Oz., 15e. $1 / 4 \mathrm{ib} ., 40 \mathrm{e}$. Lb., $\$ 1.25$.

The very best early Cabbage, and grown more extensively by market gardeners than any other variety. It is early, the heads are pyramidal in shape, very large and solid, and having but few outside leaves the plants can be set close together. and it is giving good results wherever it is used, so much so that our sales of this sort are rapidly increasing each year. The demand for this sort has brought on
 used \$1.75.

ALL-HEAD EARLY
American Grown.
This is the largest of all Cabbages, fully one-third larger than the Early Summer, therefore more profitable to the market gardener. It is the nearest approach to a thoroughbred cabbage of any variety, both in size and uniform development. As the All-Head comes in quicker than any of the other flat cabbages, it is consequently more tencabbages, it is consequently more tenwinter cabbage, Pkts., 5e. and $\mathbf{1 0 c}$.
Oz., 20c. $1 / 4 \mathrm{lb}$. , 50c. Lb., $\$ \mathbf{1 . 7 5}$.

# ${ }_{6} 5$ <br> GRIFFITH \& TURNER CO. 

NEW EARLY CABBAGE.
NEW EARLY.- American grown This is one of the finest large early cabbages grown. Forms solid, compact heads, and leaves grow close to the head, thus allowing many more cab-
bages to be grown on the acre than any bages to be grown on the acre than any other sort. One of its most striking features is its earliness. It heads so rapidly that the worms can't hurt it. Pkts., 5c, and 10c. Oz., 15c. $1 / 41 \mathrm{lb} ., 40 \mathrm{c}$. Lib., \$1.25.

LOUISVILLE DRUMHEAD. - American grown. This is the most popular intermediate or second early with market gardeners around Louisville and the Southwest. It comes off medium early, withstands heat to a remarkable extent, heads large, solid and uniform in size and color. We can recommend this sort very highly for the Southern and Middie States. Pkts., 5c. and 10c. Oz., 15c. 1/4 1b., 40c. Lb., \$1.25.

SUREHEAD.-American grown. This popular cabbage is rightfully named fine, large, solid head, with few outer leaves. It is a strong, vigorous grower, ways brings the highest price in our markets. Pkts., 5c. and 10c. Oz., 20c. 1/4 1b., 50e. Lb., \$1.75.

SUCCESSION CABBAGE.
A fine early variety, coming in a few days later than Early Summer, but it is immeasurably superior to that variety; it is nearly double the size, and is absolutely true to its type under all conditions. In addition to this, it has no tendency whatever to run to seed. It is one of the finest sorts in existence today; whether for medium early, main is so finely bred and so true to type that in a field of twenty acres every head appears alike. We can recommend it either for the market gardener, trucker or private planter, as it is a perfect cabbage in every respect, not only be-
ing of the largest size, but of handsome ing of the largest size, but of handsome
color and of the finest quality. It is probably the safest variety for an amateur to plant, as it does well at all seasons, and one is almost sure of getting a cron, no matter when it is planted. Lk., \$1.75.
ALL. SEA S O N S.-American grown. This forms a fine, large head, of superior quality, nearly as early as the Early Summer. Suitable for planting at any season. Pkts., 5c. and 10c. Oz., 20c. $1 / 4$ 1b., 50c. Lb., \$1.75.

DANISH BALL HEAD CABBAGE.
DANISH BALL HEAD.-This most excellent variety of cabbage, coming from Denmark, has grown very rapidly into favor with both market and private gardeners. It is a large, round, solid heading, medium early variety; a very sure header, having few loose leaves, consequently can be planted very close together. Although a medium early, can also be grown for a fall and winter crop, being one of the best keepers. Very popular in Philadelphia, New York and Boston markets. Pkts., 5e. and 10c. Oz., 20c. $1 / 4$ 1b., 50e. Lb., $\$ 1.75$.

FOTTLER'S EARLY DRUMHEAD OR SHORT STEM BRUNS WICK CABBAGE.

In its improved type, this is a very fine summer or early fall variety. The plants are of dwarf, compact growth, the solid, flat heads resting on the soil, while the few outer leaves grow closely about the heads. The foliage is a light bluish green in color. The heads are very flat, quite thick through, uniformly "hard and solid," and considerably earlier than the ordinary Flat Dutch strains. Good both for intermediate and winter use. Pkts., se. and 10c. Oz., 20c. $1 / 4$ 1b., 50c. Lb., $\$ 1.50$.

BOSS FLAT DUTCH-LATE CABBAGE. PREMIUM LARGE FLAT DUTCH-LATE GABBAGE. LATE OR AUTUMN CABBAGE

## BOSS FLAT DUTCE CABBAGE.-American grown. In again

 calling the attention of market gardeners and truckers to this magnificent Cabbage, we would say that it has fully met the claims we made for it upon its introduction. When we ask our customers how they like it their answer is "Splendid!" or "Elegant!" "Everything heads!" "You can scarcely find any that don't head!" The heads are large, hard, thick and flat, the leaves lapping across the center, making it the most desirable winter variety in cultivation. Try it and be convinced of its superior quality.Pkts., 5e. and 10c. Oz., 15c. $1 / 4$ 1b., 50c. Lb., \$1.50.
PREMIUM LARGE LATE FLAT DUTCH CABEAGE, American grown. Large and excellent for winter; very extensively grown. The head is broad, thick and flat, well covered in by leaves lapping across the center, outside leaves feathered to the base of the leaf stem.

PKts., 5c. and 10c. Oz., 15e. $1 / 41 \mathrm{~b}, 40 \mathrm{c}$. Lb., $\$ 1.25$.

SPECIAL PRICES TO GARDENERS AND TRUCKERS IN LARGE QUANTITIES.

IARGR IATE AMERICAN DRUMHEAD (American Grown).

DRUMHEAD SAVOY -One of the largest, most solid and best keeping late varieties.

Packets, 5c. and 10c. Oz., 15c. 1/4 1b., 40c. Ib., \$1.25.
WORID-BEATER, or AUTUMI KING.-This is a very superior late cabbage. The large, broad heads are very thick through, slightly rounded at the top, fine grained and tender, has a short stalk, green color, and one of the best keepers we know, and is a rapid grower.

Packets, 5c. and 10c. Oze, 15c. 1/4 1b., 50c. Tib., \$1.50.
ERD DUTCE. The head is round, large, solid and a deep

## Perfection Drumhead Savoy.

## American Grown

This is without any exception the finest stock of Savoy cabbage to be found anywhere. The heads are large and solid, the leaves beautifully curled, and in tenderness and flavor it is almost equal to cauliflower, while its keeping quality is first class. To say that our market gardeners are pleased with it is putting it mild; they are enthusiastic over it, as they find it so much superior to the old-time Savoy. It is specially adapted to private use, as when grown in the fall and allowed to be touched by frost it is one of the most delicious of all vegetables. Packets, 5c. and 10c. Oz., 150. $1 / 4 \mathrm{lb}$., 40c. Ib., $\$ 1.25$.

## Georgia Collards. cavad the cabiges opstis

 close bunching growth. The plant produces center leaves genIt is a very delicate vegetable and of the finest quality. pink.

## G. \& T. Co.'S CARROTS <br> 1 OZ. OF SEEED TO 100 FEET OF ROW.

CARROTS thrive best in rather a light, rich loam. The ground should be well manured with fine, well-rotted or composted manure, and be thoroughly worked quite deep. Sow from middle of April to middle of May, la rows 14 inches apart, and frmly after sowing. For field culture, Carrots should be sown in drills 3 to $3 y$ fuly. An important point is to tread the rows

## CHANTENAY

Very productive; has an extra large field culture. All who have cattle should raise a surplus of way desirable. It is very smooth, fine in this Carrot for feeding milch cows during winter. It increases texture, and of a beautiful, rich orange

## CELERY

1 Oz. Will Produce 2000 Plants. PARIS GOLDEN CELERY.
(French Stock.)
This cannot be too highly recommended, as after being thoroughly tested it has fulfilled all that has been claimed for it. It is decidedly the very best and most profitable Celery in cultivation; it is very early and entirely self-blanching. The beautiful appearance of the plant, its close habit, compact growth, straight, vigorous stalks, solid, crisp, brittle ribs, fine quality and delicious flavor commend it to all lavers of Celery. No varlety can surpass, if, indeed, equal the Paris Golden SelfBlanching in its striking appearance and delicious flavor. Our stock of this variety has been giving the market gardeners the very best results for several years.

Pkts., 5c. and 10c. Oz., 35e.
$1 / 4$ 1b., $\$ 1.00$. Lib., \$3.50. GOLDEN SELF-BLANCHING CELERY. (American Stock.)
This is a selection from the French stock grown here, and is a favorite sort with market gardeners, being very largely used.

Pkts., 5e. and 10c. Oza,30c. $1 / 4 \mathrm{Ib} ., 90 \mathrm{c}$.

Lb., \$3.00.
ROSE-RIBBED PARIS
SELF-BLANCHING
This is a sport of the Golden SelfBlanching, identical in habit, growth, early maturity, and as easily blanched. The stalks, however, are naturally quite heavily tinted with red, so that when blanched they show a distinct pink line in the ribs, contrasting finely with the rich golden yellow.

Pkts., Sc. and 10c. Oz., 30c. PARIS GOLDEN CELERY. $1 / 4$ 1b., 75c. Lb., \$2.50.
IMPROVED BOSTON MARKET.-This is a decided improvement on the old Boston Market, being earlier, larger in size and of more vigorous growth. Pkts., 5e, and loc. Oz., 15c. $1 / 41 \mathrm{lb}$. , 40e. Lb., $\$ 1.25$.

## GUERANDE, OR OX HEART.

A new French variety, intermediate in length, of fine quality; excellent table sort. The shape is nearly oval, and the color and quality all that can be desired. No market gardener should be without it.
i'kts., 5c. and 10c. $1 / 4 \mathrm{Lb} ., 20 \mathrm{c}$. Lb., 70c. EARLY SCARLET HORN.
Blunt-rooted, early, good. Favorite sort for early crop.

# SWEET OR SUGAR CORN 

## FOR TABLE USE

## (beruant, 㹳plarhkarn

## WHEN CORN IS WANTED BY MAIL, ADD 8 CENTS PER PINT TO PAY POSTAGE.

CULTURE.-Sugar Corn may be planted in rows 3 to 4 feet apart, and the seeds placed about 8 inches apart in the rows, or planted in hills 3 to 4 feet apart each way, according to variety grown or richness of soil. Do not let more than three
plants remain in each hill. It can be planted in this vicinity from first of May to last of July for succession of erop. By planting every two weeks a family may have good corn throughout the whole season.

## FIRST EARLY VARIETIES

EXTHA EARLYBALTIMORE.
The hardiest and earliest variety for table use; it can be planted earlier than any other, but is not a sweet corn; white indented grains and short ears. Prices on application. orn grown. As early as Extra Early Adams, but grows larger ears. (Crop failed.)
EXTRA EARLY ADAMS.-Prices on application.

EXTRA EARLY ADAMS.-Prices on application.
EARLY ADAMS.-A favorite in the South. Prices on application. ADAMs.-A favorite in the south. Prices on apEARLY BURLINGTON HYBRID.-Not a true sugar corn, but a hybrid or mixture between the sugar corn and the
Adams Early, being as early as Adams, but having a larger ear. It closely resembles the sugar corn. Prices on application.
NINETY-DAY CORV (Red Cob). -This is an elegant corn for truckers and market gardeners, as it is as good seller as green corn, and if not used as green corn makes a good va-
riety for feeding purposes. It may be planted for early crop and at intervals until the middle of July. Many truckers use it for their late planting, as it produces a very sure crop. Qt., 15c. 2 qts., 25 c .4 qts., 40 c . Peck, 60 c. Bus., $\$ 1.75$.

## MEDIUM EARLY VARIETIES

## Sweet or Sugar.

NEW GOLDEN BANTAM SUGAR CORN.-The earliest and best of sugar corns. It is of golden color and delicious flavor, with the sweetness of honey; can be planted earlier than the other varieties of true sweet corn, as it is very hardy. The stalks are dwarf in habit. growing about four feet high, producing two or three good ears five to six inches long, well set from the ground. Prices on application.

PREMO.-The best early sweet corn on the market. A genuine sweet corn as early as the Adams Extra Early, and larger than any other early variety. The quality is the best, ears measuring for 9 inches long, being well filled to the end; generally bearing two ears to the staik. Prices on applica-

CORY.-An early variety red cob. Prices on application.
FIRST OF ALL.—A selection from the Cory, the ears about the same size as the Cory, lighter in color and earlier. Prices 'WHITE CORY.-An early variety, with good-sized ears and large kernels. Prices on application.

STABLER'S EARLY, Of larger size than usual for the early kinds. It is remarkable for the fine flavor and sweetness, and is a desirable gardeners' and canning variety. Prices on application

CROSBY'S EXTRA EARLY.-An early market variety, very productive; ears rather short and rich, sugary flavor. Prices

CARLY MINNESOTA SUGAR,-One of the first early among sugar corn. Prices on application.
BLACK MEXICAN SUGAR.-The black corn is especially rich in sugary qualities. Prices on application.

## MAIN CROP VARIETIES

TRUCKERS' EARLY CORN.
TRUCKERS' EARLY SUGAR CORN.-This is the most desirable variety of sugar corn for truckers and gardeners to plant early. As its many excellent qualities are becoming generally known, it has come to be one of the standard sorts. It is ten days earlier than Evergreen, very productive, growing two to four ears to the stalk. The ears set low, are large
and well flled; the grain long and narrow, similar to Evergreen, but smaller. It is one of the most productive varieties green, but smaller. it is one of the mos
in cultivation. Prices on application.

COUNTRY GENTLEMAN,
COUNTRY GENTLEMAN CORN.-This is the sweetest and most deliciously flavored of all sugar corn. It is the finest variety for the table, and will delight the most fastidious epicure. It produces three to four ears to the stalk, and retains its greenness longer than other sorts. Prices on application.

HICKOX.- A very handsome and excellent variety of sugar corn; large, white grain and sweet. Prices on application.
IMPROVED NE PLES CLTRA.-Early, good-sized ears and deep grain; very productive, some stalks yielding four ears and an average crop running as high as three ears to the stalk. Prices on application.

LATE MAMMOTH. - The largest variety grown; very fine for market purposes. Prices on application.
EGYPTIAN, OR WASHINGTON MARKET.-A large variety, somewhat resembling the Evergreen; flavor peculiarly rich and sweet, and of superior quality; fine for market. Prices on application.

ZIGZAG EVERGREEN.-This is one of the sweetest and best late sweet corn, not even excepting the celebrated Country Gentlemen and Shoe Peg. The ears resemble Stowell's Evergreen in size and shape, except that the kernels are placed irregularly or zigzag upon the cob, which is always an indication of great sweetness in any variety of sugar corn. Prices on application.

KENDALL'S EARLY GIANT.-The largest early sweet corn known, and is very productive. Prices on application.

STOWELL'S EVERGREEN.
STOWELL'S EVERGREEN.-So well known that it scarcely needs description. Excellent: keeps green till cold weather ears large; one of the best. Prices on application ${ }_{\text {. }}$.
EARLY MAMMOTH.-A splendid market sort, producing large, handsome ears; grain large, white and sweet; fills out well at the end. Prices on application.

SUGAR CORN.-For fodder. Write for prices.

1 Oe. Will Plant 50 Hills; 2 Lbs. Will Plant an Acre. (Gurke

## CULTURE

For very early Cucumbers suw the first of April in a hothed upon pipces of sod (grass side down), so that they can be readily transplanted to the open ground in rich soil when danger of frost is over, or protect by hand-glasses. The vines require a warm location for early cucumbers. plant after the ground has become warm in his 4 ,ept apart for the smaller varieties, and $\bar{c}$ fet for the larger sorts. For pickling, sow from middle of June to last of July. Manure with ashes, fertilizer or some Well-rotted compost, working the manure just under the surface. Sprinkle the vines with slug-shot. plaster of air-
slaked lime, to protect from lings. The cucumbers should be gathered when large enough for use, whether required or not; if left to ripen, it destroys their productiveness.

## BALTIMORE WHITE SPINE

This is the best Cucumber for early planting, because it will retain its green color louger than any other sort. It is of good size and shape, and the popular variety with truckers around Baltimore and Norfolk, as well as the growers from Virginia to Florida. Pkt, 5c. Oz., 10c. 1/4 1b., 25c. Lb., Sミe.
EXTRA EARLY WHITE SPINE.-A strain of White Spine which has been improved through careful selection, with a view to use for forcing in hothouses and frames; also elegant for field culture. Our stock produces handsome, dark-colored fruits, which retain their color longer than other sorts. Pkt., ธ̃. Oz., 10c. $1 / 4 \mathrm{ib}, \mathbf{2 0 e}$. Lb., 75c.
ARLINGTON WHITE SPIVE-A favorite extra early variety, of desirable size, handsome shape, dark green color, holding its color longer than most others. Good shipper and sells well. Pkt., se. Oz., 10e. $1 / 4 \mathrm{lh}$., 20c. Lbo, 75.
EARII GREEX PROLIFIC:-A very productive variety, having fruits of good length and handsome form. Desirable for producing pickles of medium size and of fine quality when sliced for the table. Pkt., 5c. oz., 10c. $1 / 4 \mathrm{lb}, 20 \mathrm{c}$. Lb, 75 c .

## WHITE WONDER

The White Wonder surpasses the White Pearl both in handsome appearance and fine quality, while its strong,-vigorous, extremely healthy habit of growth enables the vines to produce a large crop of perfect fruit even under adverse conditions. Its strong constitution is exceptional. The Cucumbers are thickly set throughout the length of the vine, and are remarkably uniform in color, shape and size. Pkt., зै. Oz., 10e. 1/4 lb, 25e. Lb, 75e.

## CHICAGO PICKLING

Tety Popular with Chicago Market Garileners, and Extensively Grown
Fruit medium length, pointed at each end, with very large and prominent spines; color deep green. Pkt.

## GHERKIN, OR BURR

This is the most popular sort with the market gardeners around Baltimore and Philadelphia for pickling. Said to green better than any other variety. Pkta, Se. Oz.s 10e. $1 / 4$ 1b., 20e. Libo, 75e.

CUMBERLAND
A new and तlstinct variety, said to hare originated frorn crossing whe Parisian Pickling and the Farly White Spine. It cettainly has the good gualities of waflinf these sorts. The fruits are large, symmetrical, dark green, covered with innumerable small White spines, and are of prime quality for slicing. The vine is vignrous, whnderfuly prolific, and continues in bearing much longer than most sorts. Pkt., Se. Ois.

## CUCUMBER

CONTINUED.

## EVER-BEARING CUCUMBER

This variety is unique, and will prove valuable both for the table and for pickling. Is of small size, for the table and for pickling. Is of small size, very early, enormously productive, and extremely valnew Cucumber is that the vines continue to flower and produce fruit until killed by frost, whether the ripe Cucumbers are picked off or not, in which respect it differs from all other sorts in cultivation.

Pkt., 5̌. Oz., 10c. $1 / 41 \mathrm{~b} ., 25 \mathrm{c}$. Lb., $\mathbf{7 5 c .}^{2}$

## Cool and Crisp

This is the earliest and one of the most prolific pickling Cucumbers. The Cucumbers are straight, long, even and slim and of a dark color; it is very tender and crisp.

Pkt., 5e. Oz., 10c. $1 / 41 \mathrm{~b} ., 20 \mathrm{c}$. Lb., 75e.

## Early Cluster

A short, prickly variety, bearing in clusters near the root. A good bearer. Pkt., 5c. 0 zo, 10e. 1/4 1b., 25c. Lb., 75c.

## Japanese Climbing Cucumber

It bears abundantly throughout the season, while the climbing habit enables the hanging fruit to grow perfectly straight, from 12 to 16 inches in length; the Cucumbers are thick, tender and of delicate flavor; flesh white, skin dark green, turning to brown, and netted when ripe.

Pkt., 10c. Oz., 15c. $1 / 4 \mathrm{lb} ., 40 \mathrm{c}$.

## English Forcing Cucumber

Should be grown in hotbeds where the temperature does not fall below 65 degrees at night. TELEGRAPH is the best. 25e. Packet.

## IS ONE OF THE BEST

 SALADS FOR FALI, AND WINTER USE. One Ounce of seed to 150 Feet of Row.For early use, sow as soon as the ground can be worked in the spring, in drills fifteen inches apart, and thin plants to six or eiglit inches in the row To blanch the leaves, gather them carefully together when perfectly dry and tie them with matting or soft fibrous material. Another method is to invert flower pots over the plant. The leaves are very highly esteemed for use as salads.

GREEN CURLED.-The best sort in use. Useful as a salad, and also used for garnishing.

Pkt., 5e. Oz., 15e. 1/4 1b., 40c. Lb., \$1.25.

## Grmant <br> EGG PLANT <br> Tirrpflanze

CULTURE.-Sow the seed in hotbeds early in March. When three inches high, pot the young plants, using small pots, and plunge them in the same bed, so that the plants may become stocky. They can be planted out, from the pots, when the season becomes sufficiently warm, in May or June, or they can be transplanted into a second bed to make them strong, until the weather is warm enough to transplant, about three feet apart each way, in thoroughly-worked and well-enriched soll. Draw the earth up to the stems when about a foot high. Egg Plant Seed will not vegetate freely without a strong, uniform beat; and if the plants get the least chilled in the earlier stages of growth they seldom recover. Therefore repeated sowings are sometimes necessary. Care should be observed in cutting the fruit, so as not to disturb the roots of the plants. One ounce will produce aboat 1000 plants.

BALTIMORE EGG PLANT.L-This is decidedly the best and most profitable Egg Plant in cultivation. It is large, thornless, of beautiful shape and handsome purple color. We have never seen finer specimens of Eigg Plant than those grown from our seed. When inspecting the field of Egg Plants growing for seed we were surprised at the regular size and uniform, handsome color of the fruit all over the field.

$$

## G. \& T. CO.'S TRUE STOCK.

Large Heads, Benutiful Heads, Solid Heads; Stands Heat Well. Best of all for FALL PLANTING.

$T$HIS new Lettuce, which we introduced a few years ago and claimed to be one of the best ever put on the market, and which produced such a sensation among the large growers who tried it, still holds a high place among lettuce. As soon as the growers discovered its merits they came for more seed, and recommended it to all their friends; these, in turn, were delighted with their crops, as the result more than justified all we claimed for it. A grower at Gardenville, Md., says: "I had 3000 heads of your Baltimore Cabbage Lettuce, and they all headed but one; they are slow to run to seed." The heads are large and solid; color pretty light green, and very slow to seed; in fact, it is just what the truckers and gardeners want. A large trucker in New Jersey writes: "The Baltimore Cabbage Lettuce I had of you was certainly very fine," Pkts., 5c, and 10c. Oz., 20c. 1/4 lb., 50c. Lb., \$1.50.

IMPROVED NEW YORK, OF "WONDERFUL."
Plants of extra large growth producing heads of immense size under favorable conditions. Inner portion is beautifully blanched, and stands for a considerable time before running to seed. Outer leaves a deep, rich green. Pkts., 5c. and 10c. Oz., 15c. 1b., 30c. Lbo, $\$ 1.00$.

## ENGLISH MILL TRACK MUSHROOM SPAVVN

Lb., 15c. By Mail, 25c. Lb., Postpaid. 10 Lbs., $\$ 1.00$. 100 Lbs., $\$ 8.00$, by Freight or Express.

## CULTIVATION

$T H E$ cultivation of the Mushroom is a very simple matter and requires only ordinary intelligence and care. The mateterials needed are fresh horse manure, good soil and live spawn. The manure should not be too short, as it does not combine the necessary qualities. Long strawy litter, plentifully mixed with short manure, makes by far the best beds, as it does not heat too violently, decomposes slowly and retains its heat for a long period. Put in a heap and turn every three or four days to permit the escape of noxious gases and prevent burning. When ready for use it should be as hot as can be borne comfortably by the hand, and should also be moist. Make the beds 2 eet wide at the base, $21 / 2$ feet high, and of any desired length. The manure, when in proper condition, should be quickly handled to prevent the loss of heat, and be beaten down to make the heap firm and compact, and covered with long litter. The bed should within a few days warm to a temperature of 110 to 120 degrees. Never spawn a bed when the heat is rising, but always within afew days warm to a temperature of 110 to 120 degrees. Never spawn a bed when the heat is rising, but always on the decline and under 90 degrees. Have a ground thermometer, and keep it plunged in the bed; by pulling it out and no alarm should be felt, for if the manure was fresh it will likely produce a good crop. When the heat has decreased to 90 degrees the bed is ready to receive the spawn, which is done by raising the manure with the hand and inserting pieces of spawn 2 inches square and 9 inches apart each way. At the expiration of a few days the bed may
 be covered with soil to the depth of about 2 inches. If in a closed cellar or mushroom house, wait about ten days, but if in open shed about den days, but if in open shed poor, add a liberal quantity of bone poor, add a liberal quantity of bone meal. It requires a period of 5 to
7 weeks before they are ready for use.
Two ponnils of spawn are sufficient for a bed 3 feet by 6 feet.
Mushrooms can be readily grown in cellars, stables, sheds or pits. Many are successfully grown on a shelf in an ordinary cellar, and yield sufficient crops to compensate the grower for his effort. The space under greenhouse benches or stagings will suit them exactly, using materials in the same manner as lescribed.
MUSHROOMS ON IPASTURT LAND OR LAWN.-About the first of June take pieces of spawn an inch square, and lift the sod with a trowel or spade just sufficient to get a spawn underit, and then press the soil down hard. Set the spawn the soll down hard. set the spawn 1 to 2 feet apart. in a favorable season a crop may be expected in 3 or 4 months from the time of planting.

THE SEW OIOX CILTLRE, Gow the seed in hotbed and acre for large onions
grown very successfully by this plan.

WHITE SILVERSKIN, or PORTUGAK,-A good variety for family use; skin and flesh pure white, mild flavor and flat shape. The best white onion to grow largely for sets. Pkts., 5e, and 10e. Ox., 30c. $1 / 4 \mathrm{lb}, 85 \mathrm{c}$. Lb. $\$ 3.00$.
WHITE PEARL ONION-Earllest of all, growing with all the rapidity of a summer radish. Pearly white, waxy and transparent. Form flat and broad, flavor very mild, and it can be eaten raw almost like an apple. On rich soil it will grow very large. This is an elegant sort to sow for large onions, because of its rapid growth and fine quality. Pkt., $\overline{\mathrm{j}}$. Oz., 20c. $3 / 4 \mathrm{lb} ., 50 \mathrm{c}$, Lb., \$1.75.
AESTRALIAX BROWN-A Valuable Long-Keeping Onion.-This new Onion, introduced into the Cnited states a few years since, has met with wonderful success, and is pronounced the best keeper of all onions. The outside skin is of a deep amber brown, distinct from all other onions, extremely hard and firm, of fine flavor, and will keep almost indefinitely Australian Brown is the only onion Australian growers will plant. Pkte., je. and 10c. Oz., 20e. $1 / 41 \mathrm{~b} ., 50 \mathrm{c}$. $\mathrm{Lb} ., \$ 1.75$.

## PRIZETAKER

## American Grown

THIS is the large, beautiful onion that is seen every fall offered for sale at the fruit stores a rich straw color, and is of enormous size. Although of such large size, it is very hardy and an excellent keeper. The flavor is mild and delícate, making the Prizetaker a favorite variety for salads. By sowing this sort early you can raise a large crop of large onions the first season with very little trouble. All that is necessary is good ground, proper cultivation, and not to have them too thick. Those of our growers who have tried this variety have had remarkably fine suc WS, Pkt., 5c, Oz., 20c. $1 / 41 \mathrm{lb}$, $50 \mathrm{c}, \mathrm{Lb}, \mathbf{8 1 . 5 0}$ and fayorite sort LARGE RED.-Well-known keeper. Pto, 20e. Qt., 35 c . Peek, 22.25 . Bus., \$8.00.

TEAS. Notice. In ordering Peas to be sent by HE dwarf varieties should be liberally manured; the tall sorts will run too much to vine if heavily manured, it being better to depend on the richness of the land that was previously in good condition. Plant the dwarf in rows two feet apart; those varieties attaining a height of from two to three feet the tall kind when six inches high, on poles set every six or eight feet, with twine fastened to them about four inches apart, will answer finely.

NOTT'S EXCELSIOR PEAS.
DWARF EXTRA EARLY VAIRIETIES,
NOTM'S EXCELSIOR.-It is the best of dwarf wrinkled extra early of recent introduction. The vines are larger and more vigorous than the American Wonder, while the pods are fully one-third larger, containing 6 to 8 fine, large Peas, packed so closely together in the pods that the Peas are always more square than round. The pods are always well flled with Peas, which in sweetness and quality have no superior. Pto, 15c. Qt., 30e. Peck, \$1.75. Bus., \$6.00. himrican wonder-Very luscious.in favor. Try it. Height, 12 inches. The earliest wrinkied Pea; very productive and sweet. Better suited to the pri-
vate than to the market garden. Pt., $\mathbf{1 5 e}$. Qt., 30c. Peck, $\$ 1.50$. Bus., $\mathbf{8 5 . 7 5}$. PREMIUM GEM.-Height, 15 inches. An improvement upon the Little Gem. A splendid wrinkled dwarf Pea; very luscious in flavor. Pto, 15c. Qt., 30c. Peck, \$1.50. Bus., \$5.00.

MeLEAN'S LITTIE GEM.-Similar to Premium Gem, but more straggling in growth; pods not so well filled; height, 18 inches; seed, green, wrinkled. Pt., 15e. Qt., 30c. Peck, \$1.50. Bus., \$亏̃.00.

BLUEPPETER, OR BLUE TOM THEMB.-One of the earliest and hardiest of the dwarf varieties; blue seed, dark green pods; large Peas of excellent quality;
much superior to the White Tom. Thumb. Pt., Ivc. Qt., 30c. Peck, \$1.75. Bus., $\$ 6.25$.

MEDICM OR SECOND EARLY HALF-DWARF, WRINKLED VARIETIES.
ADVANCER. - Height, $21 / 2$ feet. A green wrinkled variety; introduced some years ago, and has always given satisfaction. At., 25c. Peck, \$1.25. Bus., \$4.75. thenfing.-Vines are about 2 foet hegh, of a branching character, forming as many as 10 stalks from a fire quality.

Qt., 25e. Peck, \$1.25. Bus., \$4.75.
YORKSHIRE HERO.-Height, $21 / 2$ feet. A wrinkled variety; productive, and of very superior flavor.
Qt., 25c. Peck, \$1.25. Bus., \$4.75.

SHROPSHIRE HERO.-A grand new second early wrinkled pea, producing long, handsome, well-ined pods in great abundance. Height, $21 / 2$ feet. Bus., \$5.00.

ABUNDANCE,-Height, 30 to 36 inches. An excellent half-dwarf, meinches long, containing 6 to 8 large Peas of excellent quality.

At., 25e. Peck, \$1.25. Bus., \$4.75. PRIDE OF THE MARKET.-A meand very productive. The pods are large, of a medium green color, and contain 7 to 9 Peas of fine quality; $1 \frac{1}{2}$ Pt., 15c. Qt., 30c. Peck, \$1.75. Bus., \$6.00. HORSFORD'S MARKET GARDRN. Height, $21 / 2$ feet. A medium early wrinQt., 25e. Peck, \$1.25. Bus., \$4.75.
IMPROVED STRATAGEM. - Helght, $21 / 2$ feet. A large, wrinkled, blue Pea of pods. More regular in its growth than the ordinary Stratagem, and in every way superior. Peck, \$1.75. Bus., Q. $^{\text {6.75. }}$

DWARF GREEN WRINKLED MAR-KOW.-An excellent new wrinkled variety. Large pods and very productive. Qt., 20c. Peck, \$1.15. Bus., \$4.00.

GARDENER'S FAVORITE.

HEIGHT, 30 to 36 inches. A wrinkled variety named and introduced by us, and which is constantly gaining friends; of most dccially suited for the market garden trade. It is also attracting considerable attention with some of our leading canners, as when packed they find the quality to be superior to any other sort. Pt., 15e. Qt., 30c. Peek,
\$1.50. Buw., \$5.00.

## PEAS-Continued FULL GROWN, MEDIUM AND LATE VARIETIES

heroine pea.
HEROINE PEA
A medium early, green, wrinkled Pea and one of the best of recent introduc tion; large, curved, showy pods; an imHeisht cropper; Peas of finest quality Peight, 2 to $21 / 2$ feet. Pt., 15c. Qt., 30e Peck, \$1.50. Buso, \$5.50.
TELEPHONE.-Height, 3 to 4 feet. Large wrinkled seeds; pods large and \$1.75. funs, \$6., 15c. Qt., 30c. Peek, $\$ 1.75$. Bus., \$6.00.
TELEGRAPH, OR LONG ISLAND MAMMOTH.-Resembles the Telephone in every respect, except they are a deeper shade of green. Pods are very attractive in appearance. Pt., 15c. Qt., 25c. Peek, \$1.50. Bus., \$5.00.

CHAMPION OF ENGLAND.-Height, 4 feet. An old favorite, rich flavored and very productive. Pt., 10c. Qt., 20 e. Peek, \$1.00. Bus., \$3.75.

FRENCH CANNER. -Height, $3 x / 2$ feet. The celebrated Pea used in France by the canners. It is wonderfully prolific, bearing an abundance of long pods, containing 7 to 9 peas of excellent flavor. Pt. 10c. At., 20c. Peck, 75c. Bus., \$2.50.
IMPROVED SUGAR MARROWFAT PEAS (Genuine Stock). - Height, $31 / 2$ feet. Grows a strong vine, bears in abundance large, filled pods. The truckers' favorite. Pt., 10c. At., 20c. Peck, \%e. Bus., \$2.50.

## EDIBLE PODDED OR SUGAR PEAS

## MELTING SUGAR-Edible Pods.

TSugariety is ahead of all other Sugar Peas, not only in size of for its delicid prolific bearing, but alse foright of 5 feet flavor. It grows to the height of reet, bears a profusion of very large, broad, handsome light green pods, and are so brittle that they snap Without any strings. Pt., 15c. Qt., 30e. Peek, \$2.00.
TALL GRAY SUGAR.-Edible pods; cooked in the pods same as Snap Beans. Pt. 15c. Af., 30c, Peck, \$2.00.
DWARF GRAY SUGAR.-Edible pods; quite a favorite. Pt., 15e. Qt., 30c. Peck,
\$2.00.

## PUMPKIN.

PLANT in May, in hills 8 feet apart, Allot 10 seeds to each hill, as bugs often destroy the young plants, but only allow 2 to 3 healthy plants to remain in each hill. They are usually planted in fields with corn or potatoes.
G. \& 'T. CO.'S MARYLAND SWEET POTATO.

THIS is the best table Pumpkin in cultivation In shape and size it somewhat resembles the Cashaw, but much more beautiful in color, being a handsome green and white stripe. The flesh is a rich yellow color, solid, fine grained, very thick; flayor delicious.

Pkt., 5c. Oz., 15c. $1 / 4$ ib., 35e. Lb., \$1.00.
LARGE CHEESE.-Skin reddish orange, flesh Phick, fine and sweet. Oz., 10c. 1/4 1b., 20c. Lb., 60c.
TENNESSEE SWEET POTATO.-A splendid pie and cooking pumpkin. They grow pearshaped, of medium size, slightly ribbed; skin is creamy white, lightly striped with green; flesh very thick, creamy white, dry and fine-grained, keeping well until late in the spring. When cooked resembles sweet potatoes, but much more delicious in taste.

Pkt., 5c. Oz., 15c. $1 / 4$ Ib., 20c. Lb., 50c.
CONNECTICUT FIELD.-Very productive and grown for feeding stock. It is so well known that it does not need description.

Pt., 15c. Qt., 20c. Lib., $25 \mathrm{c}_{\mathrm{c}}$
YELLOW CASHAW, OR CROOKNECK,-Solid flesh, fine and sweet; keeps well. Pkt., 5e. Oz., 10c. $1 / 416$., 20c. Lb., 60e.

ADMIRAL DEWEY.
Here we have a most excellent Pea; with large, handsome pods; Peas of the highest quality. More dwarf than the Stratagem, and about a week earlier in maturing, regular and uniform in growth; vines stocky, healthy and of vigorous growth; pods long, frequently containing 10 peas, of tender and delicious flavor. Don't fail to try it.
Pt., 20c. At., 35̌. Peek, \$1.75. Bus., $\$ 6.00$.

## RADISHES

LONG BLACK STANISH.-A large winter variety; one of the hardiest, with dark green leaves, firm in texture, keeping until spring. Pkt., 5c. Oz., 10e. $1 / 4$ lb., 20c. Lb., 50c.

LARGE WHETE SPANISH (Winter). - Fine keeping quality. Pkt., 5c. Ox., 10e. $1 / 4$ SPANISH RADISH, 1b., 20c. Lb., 50c. ROUND WHITE SPANISH:-A good fall or winter variety.
Pkt., 5e. Oz., 10c. $1 / 4$ 1b., 20c. Ib., 50e. ROUND BLACK SPANISH.-A fine globe-shaped Radish, very popular with the Germans, known as Rettig; good quality.
Pkt., 5e. Oz., 10c. 1/4 1b., 20e. Lib., 50c. SCARIET OLIVE-SHAPED RADISH. -A showy half-long variety of pretty shape and bunches beautifully.
Pkt., 5c. Oz., 10c. x/4.lb., 20e. Lb., 60e.

## GRIFFITH Q TURNER CO.

REUBABE ROOTG. - 15c. enol

The soil best suited to the Potato is a rich, sandy loam; but it seems to thrive in almost any soil or climate. The potato and not allowed to come in contact with the tubers. On no other crop are the reandis to be used, it should be well rotted, fest as on the Potato. Almost invariably the tubers are smoother, brighter results from the use of phosphates so maniinfluence of wire worms. GRIFEITH \& TURNER CO.'S PIAN'FFOOD is especially adapted from rust and the destructive and at the same time prevents disease. Plant as early in the spring as the three feet apart and one foot in the rows, covering in light, warm soil as the ground can be thoroughly worked in rows inches deep; draw the earth to the plants as they advance in growth. The soil should be and in cold, wet ground three season to prevent the surface from baking.

G. \& T. CO.'S EXTRA EARLY PRIZE.-This Potato is in all respects a very superior early sort. It proved to be the eating qualities first-class. We consider it the found its Potato on the market today. Peck, 60c. Bushel, \$1.75. Bar-
rel, \$4.50.
BLISS TRIUMPH.-This beautiful variety combines the wonderful productiveness of the Peerless with all the good qualities of the Early Rose; is much more productive and matures its crop at least a week in advance of the Early Rose.

Peck, 50c. Bushel, \$1.75. Barrel Sack, \$4.50.
MAINE, or HOULTON EARLY ROSE.-The Early Rose led the list for over 30 years, and is today one of the best early near Houlton, Maine; is rugged and pure and on new land, good crops as those which made the Early Rose famous in as early years. Remember that this stock is not to be confounded with the old run-out Rose, grown in other sections.

Peck, 50c. Bushel, \$1.50. Barrel Saek, \$4.00.
EARLY OHIO.-This is very early and productive, of fine quality and an excellent keeper.

Peck, 50c. Bushel, \$1.75. Barrel Sack, \$4.50.
EARLY BOVEE.-One of the earliest varieties; good size, very smooth; uniform, perfect shape; eyes shallow; light skin and white flesh. Cooks dry and floury; of superb quality; a

Peck, 50c. Bushel, \$1.75. Barrel Sack, \$4.50.
CROWN JEWEL.-Very early and prolific; skin pinkish White. One of the best for early market. It is planted very

Peck, 50c. Bushel, \$1.50. Barrel Sack, \$4.50.
WHITE BLISS TRIUMPH, or PRIDE OF THE SOUTH.Extra early round white; identical with the Red Bliss, only different in color. A very fine variety for early market or
family garden. Peck, 50c. Bushel, \$1.75. Barrel Sack, \$4.50.

BEAUTY OF HEBRON.-Very rapid and vigorous grower, ripening as early as Early Rose, which it resembles, but freuse, either baked or broductiveness and excellence for table

Peck, 50c. Bushel, \$1.50. Barrel Sack, \$4.25.
EARLY PURITAN.-A distinct and early variety; both skin and flesh white; quality superb, dry and foury; immense cropper. Fine for market gardeners.

Peck, 50c. Bushel, \$1.75. Barrel Sack, \$4.50.
EARLY HARVEST.-This beautiful new early Potato is a heavy yielder for an early variety; good size, nearly white. A good one for the market garden.

Peck, 50c. Bushel, $\$ 1.50$. Barrel Sack, \$4.25.
G. \& T. CO.S BOUNTIFUL.-The finest middle orop variety yet introduced. Before putting it on the market we have given it a thorough test, and are convinced of its superior qualities. A heavy cropper, yielding large, smooth, handsome tubers. Peck, 60c. Bushel, \$1.75. Barrel Sack, \$4.50.
EARLY NORTHER. - This superb Potato originated at Caribou, Maine. It resembles the Early Rose in shape and color, matures earlier than the Rose, and is much more productive. Under our own observation the past season it yielded more than the Rose, matured earlier, and was in all respects superior. Peck, 50c. Bushel, \$1.50. Barrel Sack, \$4.00.
NEW YORK EARLY ROSE.-A leading variety for earliness, quality and productiveness. Barrel Sack, \$4.00.
IRISF COBBLER (A New Sort). -Very productive matures early; shape chunky, eyes strong and deeply set, skin netted, flesh white, quality very superior. The writer's attention was called to this variety while on a tour of inspection, and we concluded to place it in our collection, and find after two years' experience that it is a very superior variety. Don't fail to get it.

Peck, 65c. Buskel, \$1.90. Barrel Sack, \$4.95.
PROSPERITY.-A middle-crod variety, one of the handsomest large Potatoes ever produced. The yield is immense, and even under unfavorable circumstances can be relied on; flesh very White; cooks dry and mealy.

Peek, 60c. Bushel, $\$ 1.50$. Barrel Sack, $\$ 3.50$.
RURAL NEW YORKER, No. 2.-A valuable variety of large size, very smooth and a great cropper; in quality unexcelled. This variety is yearly becoming more popular as the best late long keeper, and we recommend it highly.

Peck, 50c. Bushel, \$1.50. Barrel sack, \$3.50.
RURBANK, This is an old and reliable variety, and is A No. 1 for a late, large-yielding, good-keeping Potato, a di for table use, after January 1, is one of the best.

Peck, 50c. Bushel, $\$ 1.50$. Barrel Saek, $\$ 4.00$.
NEW QUEEN.-A grand Potato of recent introduction, closely resembling Beauty of Hebron in appearance, color, size and shape, but is 7 to 10 days earlier and a heavy yielder. Our seed of this variety comes from Maine, where it originated, and is pure and true to name.
Peek, 60c. Bushel, \$1.50. Barrel Sack, \$4.25.

GREEN MOUNTAIN.-A fine late sort.
Peck, 50c. Bushel, $\$ 1.50$. Barrel Sack, \$3.50.

CHOICE JERSEY SWERTS AT MARKET PRICES DURING SEASON. WRITE FOR QUOTATIONS.

Second Grop Southern Grown Seed Potatoes

Sseoond crop seed we often have been asked what it signified, and for the benefit of those who do not know we will state that they are product of the first planting in the spring planted again as soon as dug, and the in the fall for next season's use.
The advantage derived from second seed over first crop is that they do not sprout or shrivel or lose any of their vigor through the winter, having been checked by frost before maturity; they when planted. They rarely send up more than one sprout; this may divide into several branches. The consequence tubers, which grow to full marketable seed
The results from the planting of this sales in consequence have grown much The following varieties are grown EROWN JEWEL.-This is a seedling of the Early Ohio. Skin white, with a ing evenly throurh to the best. Peek, 50c. Bushel, \$1.85. EARII ROSE. - Peck, 50c. Bunhel. 1.85. Barrel, \$4.90.

## 30 G GRIFFITH \& TURNER CO. 0

ITALIAN RYE GRASS.
ITALIAN RYE GRASS. - Is an annual, and should be sown every year at the rate of fifty pounds per acre. It can be
sown during August, September or October. It should be mown as early as the blossoms appear, or the hay will not be so good, and it can be cut every month from early spring if
the soil and weather are suitable. Bus., 20 lbs. $\mathbf{~ b b . , ~ 1 5 e . ~}$ the soil and weather are suitab
$10 \mathrm{lhs} . \mathrm{\$ i.00}$. Per $100 \mathrm{lhs},. \$ 9.00$.

CRESTED DOG'S TALL (Cynosurus eristatus).-Should enter in moderate quantity in permanent pasture mixtures, and in larger quantities for lawns, as it possesses in a marked

AWNLESS BROME GRASS (Bromus inerinis).comparatively a new grass gary (Europe), but in Hunhome, it is the chief meadow grass of the sandy moorlands. It grows coarse, re sembling Orchard Grass prefers light, dry soil. It tracted droughts well, anr will thrive upon soils too poor and dry to grow any
thing else but broom sedge hence is valuable for such situations, both for grazing and hay, and especially in mixtures with othergrasses. up very much in the alked cultural press, especially in the West, and is worthy of rate of from 35 to 40 pounds per acre when sown by itfall. Lb., 20c. Bus. of 14 1bs., s2.25.

ENGLISH RYE GRASS (Lohium perenne). -This makes a quick growth very early in spring, and is adapted for cool,
moist locations. 24 lbs. to the bushel; 60 lbs . to the acre.

BLUE GRASS. WOOD MEADOW Bus., \$2.00 (Poa nemoralis).An early nutritive grass; thrives better under trees than other grasses. Is also an excellent pasture gras

RHODE ISLAND BENT
GRASS (Agrotis canina), - A very fine variety for lawns. Lb. $30 c$.
SWEET VERNAL (Anthoxanthum odoratum).-True perennial; emits an agreeable od

KEN'UUCKY BLUE GRASS. - It is rather sensitive to heat, but not so to cold weather, and on this account does its best in the fall, winter and spring. It grows slowly at first, forms a very compact turf, making a fine pasturage when once established. It is much the best, however, to combine other grasses with it, for either lawn or pasturage. Sow in the spring or fall. Fnncy, triplecleaned. Per Ib.,25e. Bus. of 14 lbs., $\$ 3.00$. NOTICE.-Beware of cheap Canada Blue Grass, but if you want it we will supply same on short noticeatlow prices.

## OUR SPECIAL GRASS MIXTURE FOR HAY AND PERMANENT PASTURES <br> RED TOP, OR HERD'S GRASS Agrosis vul-

 and good crop of fine quality hay, and succeeds on a greater variety of soils than any other grass in general use, giving very good results on light sois and the very best results on heavier, moist in the spring and matures its crop at starting time as Timothy. Is excellently adapted for seeding with Timothy for hay, and furnishes excellent pasturage afterwards. When it gets well established it will gradually supplant othergrasses. The grades of seed usually sold are:

CHAFF RED TOP.-Seed in chaff.
EXTRA CLEANED UNHULLED RED TOP.FANCY CLEANED RED TOP.-Hulled free from all impurities. We would advise ou, customers to sow the Extra Cleaned Unhulled or Fancy Cleaned Seed.

Chaff Red Top.-Sow 4 to 6 bushels to the acre, 10 lbs to bushel. Price, 25c. bus.
Extra Cleaned Unhulled Red Top.-Sow 2 to 3 bushels to the acre, 10 lbs . to the bushel. Price,

Fancy Cleaned Red Top.-Sow 12 to 15 lbs , to the acre. Price, 18c. 1b.; $\$ 12$ per 100 lbs.; bushel of 32 lbs., $\$ 4.00$. TALE MEADOW OAT GRASS (Avena elatior).-Most valuable for pastures on account of its early and
 abundant supply of foliage, which is relished by cattle, early and late. For hay it may be cut twice a year, and for green soiling it may be cut four or five times in favorable seasons. It is very hardy and withstands extreme drought and heat and cold. Height, 2 to 4 feet. 50 pounds to the acre. ( 10 pounds to bushel.) Lb., 28e. 100 lbs., $\$ 22.00$.

CREEPING BENT GRASS (Agrotis stolonitera) --Excellent for lawns; succeeds well in all conditions; makes a low, velvety growth. Lb., 28e. Bus. (20 lbs.), \$4.25.

MEADOW FOXTAIL (Alopecurus pratensis).-Closely resembles Timothy in growth, but has a soft, feathery head. It is a valuable pasture grass by reason of its rapid growth. 50e. Bushel, \$3.00.

SHEEP FESCUE (Festuca ovina). - It is a densely tufted perennial grass for dry, sandy and rocky soil where scarcely any other species will grow. It roots deeply, and forms a dense, short tuft, suitable for lawns and pleasure grounds where the soil is sandy. It affords wholesome food for all cattle, especially sheep. Specially recommended for pasturage mixtures. Sow about 30 pounds per acre. Lb., 25c. Bus., of 12 lbs., ste.00.

## HAY AND PASTURE GRASS

$\mathrm{I}^{\mathrm{s}}$prepared especially to meet the demand for a mixture that will be desirable either for cutting for hay or for use for pasture, and contains such grasses as are best adapted for these purposes. In ordering, please state whether you want a mixture for upland or low ground. MIXTURE FOR UPLAND.-Fourteen pounds to the bushel, three Per bus., \$2.50. 10 bus. for $\$ 23.50$.
MIXTURE FOR LOWLAND.Fourteen pounds to the bushel, three bushels to the acre.
MEADOW FESCUE. Per bus., \$2.50. 10 bus. for \$23.50.
MEADOW FESCUE, RANDALL, OT ENGLISH BLUE GRASS (Festuca pratensis). -This should be very much more largely used than at present. It makes a very good hay and pasturage grass, and is particularly valuable for fall and winter pasturage, as it remains green throughout the winter. It is very popular in Southwest Virginia, East Tennessee and the Mountainous districts of North Carolina, where it is very highly appreciated as a large-yielding, nutritious pasturage and hay grass. It succeeds well in nearly all sections of the South, and should be very largely used in pasturage and hay mixtures, being specially suitable for sowing with Red Top and Timothy for hay, or with these and Orchard and Tall Meadow Oat for permanent pasturage. Sow either in the spring or fall at the rate of 50 pounds to the acre. Thrives better under trees than other grasses. 22 lbs. to bus. L.b., 20c. 100 lhs.; $\$ 15.00$.

# GRASSES AND CLOVERS CONTINUED 

## MILLET

GERMAN, OR GOLDEN MILLET,
An improved variety, medium early, growing 3 to 5 feet high. The heads are closely condensed. though the spikes are very numerous. This is the best Price. Lb., 10c. Ask for prices in quantity.

HENGARIAN MLLET (Panicum ger-manicum).-Early and productive, growing 2 to 3 feet high, with an abundance of foliage and slender heads. Price; Lb., 10c.

COMMON MLLET. - Weight, per bushel, 50 pounds. Market prices. Ask for quotations.

ORCHARD GRASS
(Dactylis glomerata.)
One of the best and most reliable grasses for the Middle and Southern States, either for hay or pasturage. It succeeds well on nearly all soils, but does best on upland, loamy or moderdoes best on upland, loamy or moderspring and continues well into winter. It is of quick growth and relished by stock, especially when young, and bears close grazing. It makes excellent hay, and gives the very best results mixed and grown with Tall Meadow Oat Grass and Red Clover, as suggested under tiie head of Tall Meadow Oat Grass. It should be cut when in blossom, as the hay is injured if the seed is allowed to ripen. It can be sown in the spring or fall either with grain or alone. Sow bushels per acre if sown alone, Red Clever, one and one-half bushels of Orchard and seven pounds of Clover are the quantities usually sown. By ex press, 玉⿹̄e. 1b. Bus. of 14 llos., \$2.50.

## CLOVER SEED

## RECLEANED RED CLOVER

W'e take great pains to supply an extra quality of Red Clover at a reasonable price. Farmers should not sow a grades for those who wish them. 25e. 1b. Hy mail, 35e. 1b. Ask for prices in large quantities.

## ALSIKE, OR SWEDISH CLOVER

Hardiest of all the Clovers, and on rich, moist soils yields an enormous quantity of hay or pasturage. Valuable for sowing with other clovers or grasses, as it forms a thick spring, 6 pounds per acre when used alone.

Lb., 25e. By mail, 35e.

One of the most valuable among Clovers, resisting drought and remaining green when other sorts are dried up. Sow on rich, moist loam or sandy soil. Prepare the land thoroughly and sow, either fall or spring, 20 pounds to ) the acre.

## FINEST IN THE COUNTRY.

Last June you sent me four bushels of German Millet, and I now have five acres of it. Everyone says it is the fnest in the country. It is in a low meadow, and the dry weather does not seem to have any effect upon it.-F. A. WELTY. Maryland.
 drought, and will produce broadcast at the rate of 5 tb the acre, or 2 to 3 lbs. in drills. It is unequaled as a pasture for sheep, and as a fattening food for all kinds of live stock it is without a rival. Lb., $15 \mathrm{c} ; \mathrm{by}$ express, 10 lbs. and over.
12e. lb., not prepaid; $\$ \mathbf{1 0 . 0 0}$ per 100 lbs. If wanted by mail, add 8e. per pound for postage.
 be rich and well prepared. Plant seeds in rows 3 feet apart by 18 inches. The plants should be cultivated as soon as they are out of the ground. Harvesting should be done when the IMPROVED EVERGREEN.-Th well and rep feet. Lb., 25e., postpaid. Peck, \$1.00. Bus., \$3.00.

WINTER VETCHES (Vicia villioga).
-Also caHed Sand Vetch, or Hairy Vetch. Recommended for fall sowing with rye, as in many localities in the North it is hardy, remaining green all winter. A valuable food for stock in early spring. Use 1 to 2 bushels per acre. Lo., 15e. Peck of 15 1bs., \$2.10. Bus. of $60 \mathrm{lbs} .4 \$ 7.25$.

RUSSIAN SUNFLOWER,-Growing te double the size of the common sunfower and the yleld of seed is twice as great
It is highly recommended for poultry. the best egg producing food known. Lio. 10e. 4 lbs., 25e. Add 8c. lb. by mail.

## SOJA BEANS

The great drought resisting forage crop, unsurpassed in nutritive value for feeding; also makes a splendid soil improver. Sow broadcast one-half bushel to the acre, or it may be planted in drills 3 feet apart and 1 foot between plants. Price on application.
CANADA FIELD PEAS Sown in February, March or April, With a small quantity of oats, they $11 / 2$ bushels per acre broadeast with half a bushel of oats. Cut for hay before the a bushel of oats. Cut for hay before the.

Write for special prices if a quantity
is-required.

## CRIMSON CLOVER

THE GREAT NITROGEN GATHERER.
The best crop for hay, silage and green manuring-all winter and spring pasturage, For hay, it must be cut before it comes into full bloom, as otherwise it may cause hair-balls to form in the animal's stomach. It is used on poor and rich land. It is seeded in this country in June, July, August, September and October, and will produce an enormous crop early in the following spring, suitable either for consumption as green food or for hay. 15 to 20 pounds should be sown to the acre, according to the quality of the ground. 15c. per 1b.; by mail, 25c. 10 1bs., by express, $\$ 1.00$. Write for prices in quantity.

For years we have taken special care in the selection of the various sorts of Grass and Clover Seeds for field culture, and in consequence our trade in this line has rapidly increased. Purity of stock and high germinating quality we consider essential.

As we handle very large quantities of these seeds we are enabled to supply the best quality at lowest prices.

## SORGHUM, OR SUGAR CANE

EARIT AMBER grows 10 to 12 feet high and yields large crops of fodder, which is relished by all kinds of stock. It will produce two cuttings during the summer. Sow 3 or 4 quarts per acre in drills and cultivate same as corn. For hay, WARLY onANGE has a large, strong growth, but requires longer time to mature than the Early Amber. Very popular in the South, where there are long seasons.
Prices same as Early Amber.
TEOSINTE, A most valuable and enormous yielding cutting forage crop, but should be planted very early to succeed well. Good to use as green food, and also makes an excellent fadder. It branches as many as 50 stalks from one seed. Plant in May or June in rows 4 to 5 feet apart each way. Oz., 10c. $1 / 4$ lb., 25e. Lb., $75 \mathrm{c} .$, postpaid.

## COW PEAS

THE GREAT SOIL ENRICHERE MAKES POOR LAND RICH. MAKES GOOD LAND BETTER.

BLACK COW PEA.-It is a splendid land improver and most valuable as a forage crop, making an enormous yield of rich, nutritious food. Sow in May or June at the rate of one bushel per acre for seed, or two bushels for soiling.
BLACK EYE COW PEA. The Black Eye Cow Peas are y prolific and bring a good price on our market
patichakes a splendid forage pea ines stay green longer than other varieties; pods ripen earlier

WONDEREUL, or UNKNOWN.-This makes an enormous and remarkable growth of vines, but requires the full growing season to make its crop. In yield and growth of vines it surpasses any of the varieties of Cow Peas, and it produces very largely of the shelled Peas. This variety should be planted in May in order to come to full maturity.

## VETCHES, ORTAREG, -SPRING VETCHES (VIeIn

 with peas in character. Highly valuable for soiling or for green manuring. Sometimes grown with oats for mowing and feeding to stock. Use 2 to 3 bushels to the acre. Sow in spring while ground is cool and moist, or in early autumn. Lb., 10e. Peck of $15 \mathrm{lbs.}, \mathrm{\$ 1.25}. \mathrm{Bus} .\mathrm{of} 60 \mathrm{lbs} ., \$ 4.00$.

The heads contain small white seeds, which make an excellent flour. They are greedily eaten by horses and cattle, and make fine feed for poultry, either fed in the grain or ground and cooked. Use 4 to 5 lbs . to acre.

## Griffith \& Turner Co.'s Evergreen Lawn Grass

This is a first-class mixture prepared by ourselves, and containing nothing but choice seeds-just the thing for tennis, croquet and ball grounds, remaining green and fresh during the hot summer months. Widely known and extensively used on the finest private and public grounds around Baltimore, Washington and elsewhere with the most satisfactory results. Nothing adds to the attractiveness of suburban homes more than a well-kept, closely-cut, velvety lawn; hence the importance of securing the best seeds, This we offer in our selected Evergreen Lawn Mixture, containing different varieties that grow and flourish at different months of the year, so that a rich, green, velvety lawn is constantly maintained. It is adapted to the small grass plots of city homes. Pint, 10e. Quart, 20e.; by mail, 23 . $1 / 2$ Peck, 65c. Peck, \$1.10. Bushel of 20 pounds, \$4.00. By frelght or express, not prepaid.

## SHADY NOOK GRASS

On nearly all lawns there are bare spots under the shade of trees. With this mixture the above can be easily corrected. It is a combination of grasses which are found growing in the woods in their natural state
Ground that has been densely shaded by trees is frequently "sour" and is apt to be covered with moss. In such cases apply slacked lime at the rate of one bushel per thousand square feet, but the moss should ve first removed with a rake

Price: Lb., 35c.; 5 lbs., $\$ 1.75$; Bu. of 20 lbs., 87.00. Add 8e. for postage.

## WHITE DUTCH CLOVER <br> (Trifolium Repens.) See page 31

The best variety for lawns, as it forms a close herbage and remains green throughout the season. It is also valuable when mixed with grass seeds for pasture. Sow in spring at the rate of 6 pounds per acre when sown alone, half the quantity. when sown with other grasses. mail, 35c. 10 pounils by Pound,
express, $\$ 2.25$.

THE "PET" LAMVN TRIMMER $\$ 3.00$

Used for trimming grass from the edges of sidewalks. It will carve out a little strip of sod and deposit it on the walk several on the walk several where it may be very easily swept up.

## GRIFFITH \& TURNER C0.'S GOLF LINK MIXTURE

## Bushel.....................2.75. <br> Ten Bushel Lots <br> . $\$ 2.50$.

There being a growing demand for a grass mixture suitable for golf and cricket grounds, we have made a study of the grasses best adapted to these purposes, and have them mixed in proper proportions to give desired results. Many of the public and private grounds around Baltimore and other places have been sown with our mixtures, and the grounds have won the admiration of thousands of visitors.
It is highly essential that golf and cricket grounds should be mowed closer than ordinary lawns. 14 pounds to bushel.

# 34 <br> G GRIFFITH \& TURNER CO. 

26. ASTER, GERMAN (A).-All colors and shades of the best German sorts. Sow seed early and transplant to rich soil.

Packet, 5 cents.
2\%, ASTER, TRUFFAUT'S PERFECTION (A) -A very favorite class; thrifty, upright growers; flowers large, almost perfectly round, with incurved petals. The florist's preference; $13 / 2$ to 2 feet.
28. PRINCESS SNOWBALL (A).-This is an entirely distinct variety of Aster The flowers are pure white, and are formed of short, thickly set imbricated petals, there being about 25 to 30 on a plant.

Packet, 10 cents.
29. MIGNON ASTER (A). - A splendid new class of Asters. The plants are semidwarf and bear in profusion flowers of a very double nature, the petals overlapping each other

The lotter "A" means annual. The letter "P" means perennisl.

BED PLANTS.

## otted Plants

PRICES ON 100 AND 1000 BY EXPRESS NOT PREPAID.
Our collection of Greenhouse Potted Plants has been very carefully revised, and the varieties have been selected with great care, cutting out those of lesser value. Our Cannas, Chrysanthemums, Dahlias, Geraniums, Roses, etc., may, appear small, but we wish to present to our friends a condensed list of nothing but the best, and avoiding a long list, which only tends to confuse the buyer. Other varieties, however, possess merit, and a further descriptive list can be had on application. Will state in passing that we can furnish most anything in this line.

[^2]
## BEGONIAS

These are now among the most popular plants for beds of summer fiowers. Nothing can exceed the brilliancy and richness of
flowers. From the time the first blossom appears until all growth is stopped by frost they are never out of bloom

SPECIMEN PLANT FLOWERING BEGONIA.

## FLOWERING VARIETIES

VERNON.-Beautiful waxy foliage. Dwarf, compact grower. Splendid for bedding in semishaded places.

ALBA.-White flowers tinted delicate pink. ROSEA.-Beautiful light begonia pink.

10c. each. $\$ 1.00$ per dozen.

ALTERNANTHERA A beautiful class of
dwarf plants growing only 6 inches high, admirably adapted for forming letters, ribbon lines, edgings or bed. Can be cut with shears, and, like long grass, grows thicker and marked on the lawn with these plants is very pleasing.
AUREA
Bright golden NANA. BRILLIANTISUM. New. Brilliant scarlet: when worked on the lawn or with other plants the effect is very
striking MAJOR.-The best red. Rosy crimson.
VERSICOIOR.Chocolate, green and red. Plants, each, $\mathbf{1 0 c}$. By express, not preKAEMP MERI
(JAPANESE IRIS.)
These magnificent Japanese Iris are among the most beautiful of our summer flowering plants, and are destined to become
 great favorites.

They commence flowering early in July, and continue in bloom for five or six weeks, if plentifully supplied with water while growing and flowering. Each, i5c.; by mail, 20c. Four for 50e.; \$1.25 per dozen; by express, not prepaid.

## SPANISH IRIS.

Excellent for pot culture and are now being grown for cut flowers. Plant in the open ground in autumn and protect slightly during the winter months. Early in April cover the beds with glass, and the flowers will be ready for cutting in May. Per clump, 10c.; per dozen clumps, \$1.00. By mail, add 5e. each.

# CANNAS 

Few flowering plants combine so many fine qualities as the modern Canna-a race of sub-tropical bulbous plants, of most easy culture, rapid reproduction and good keeping qualities. The floral world has been astonished by their lux uriance of foliage and gracefulness of bloom, which is of immense size, borne in large masses and trusses, combining orange and scarlet, bringing them to the front as the finest ornamental plant in commerce. Useful for garden, green house or sitting-room.

## KING HUMBERT

## KING OF ALL CANNAS

Giant Flowered. Orange Searlet. Bronze Leaf.
This remarkable Canna has been the sensation of the past several years. Of all the wonderful flowering and foliage plants introduced, this one takes the lead for size, color and habit. It is a cross between the Orchid flowering and the French or Crozy type, combining the best features of boththe large flowers of one with the free blooming character of the other: the handsome leathery foliage with a strong, noble habit. It has the broadest leaves.

It is so distinctly in advance of any other Canna that the demand for and use of it must be universal. Potted plants only. Price, 30c. each; 3 for 7 Jc.; 1 dozen, $\$ 3.00$.

ALLEMANIA, - Exceptionally large flowers, frequently measuring $61 / 2$ inches across, the upper petals salmon, with broad border and markings of golden yellow, while the lower petals are dark salmon marked with yellow in the center foliage dark green: 6 feet. Pot-grown plants. 15̌c. each. \$1.50 dozen.

BLACK BEALTY-New dark-leaved Canna: has the richest bronzy purple foliage, shaded black, with crimped wavy margins, small crimson flower; 5 feet high. Pot-grown plants. 13c. each, \$1.50 dozen.

CHARLES HENDERSON. - Probably the most popular crimson Canna in cultivation, of uniform, compact habit, rarely exceeding $31 / 2$ feet in height. Pot-grown plants. 15e. each, $\$ 1.50$ dozen.

CHICAGO.-Has been pronounced the best of all red varieties. Color clear, deep vermilion, smooth and without markings, except a purplish gloss; 5 feet high. Pot-grown plants. 15c. each, $\$ 1.50$ dozen.

ITALTA, It is of a bright orange scarlet, with a very broad yellow golden border. The flowers, which are produced on massive stems about 16 inches long, are set well above the foliage, which is large and heavy, similar to that of the Musa Ensente; 6 feet. (See cut.) Pot-grown plants. 15e. each, $\$ 1.50$ dozen.

KING HUMBERT CANNA.
DAVID HARIM.-Deep bright vermilion, bronze foliage, $31 / 2$ feet high. Pot-grown plants. 15e. each, $\$ 1.50$ dozen.

DUKE OF MAREBOROUGH.-Beautiful crimson maroon; the largest Canna grown. A sturdy, erect grower, with fine $\$ 1.50$ dozen.
EGANDALE.-Fine dark variety; flowers of a soft currant red; $3^{1 / 2}$ feet. Pot-grown plants. 15c. each, $\$ 1.50$ dozen.

MADAME CROZY.-Flowers of dazzling crimson scarlet bordered with golden yellow. A marvelous and rich combination of colors. The plant is of vigorous growth, yet very dwarf in habit, rarely exceeding 4 feet in height. Pot-grown plants. 15c. each, \$1.50 dozen.

QUEEN CHARIOTTE.-This new German sort is one of the handsomest scarlet varieties ever introduced, having a
distinct golden belt around each petal. Height, $31 / 2$ feet. distinct golden belt around each petal.
Pot-grown plants. 15 e. each, $\$ 1.50$ dozen.

SHENANDOAH.-Rich ruby red or bronze foliage, ex quisitely veined and tinted. The beautiful rose pink flowers are produced in large trusses very early and abundantly Pot-grown plants. 15c, each, \$1.50 dozen.

FLORENCE VAUGHAN.-The finest yellow-spotted variety yet sent out. The foliage is massive and of rich green color 4 feet. Pot-grown plants. 15e. each, $\$ 1.50$ dozen.

All the above by express, not prepaid.
If wanted by mail, add 3c. each for postage
DRY OR DORMANT ROOTS OF THE ABOVE CANNAS, EXCEIT KING HUMBERT, each, 5c.; per dozen, 35e. By express, not prepaid.

MIXED CANNA ROOTS IN SPLENDID VARIETY, OUR SELECTION, 5e, each; per dozen, 35c.; per 100, \$2.75. By express, not prepaid.

## COLEUS

FIFTEEN CHOICE VARIETIES.
10c. each; 75c. per dozen; $\$ 4.00$ per 100 , by express, not prepaid.

## GRIFFITH Q TURNER CO.

## CHRYSANTHEMUMS Hardy Pompone <br> These beautiful small-flowered varieties are certain to become

 popular for outdoor bedding purposes. They are absolutely hardy and produce an abundant profusion of blooms, and the plants lend a coloration to the garden just at a time when other plants have a coloration to the garden just at a time when other plants have not materially affect the flowering, and it will frequently happen that an armful of flowers can be cut after a sharp frost. The collection we offer embraces all the leading colors, and, with but a slight covering of leaves or coarse stable litter during the winter, will take care of themselves after once planted.Alice Cary-Orange

Stratagem-Dark Red Orange
Sunshine-Pure Yellow.
Tivoli-White Edged Rose.
Price, 10c, each; per dozen, $\mathbf{7 5}$.; per 100 , $\$ 5.00$, by express, not prepaid.

The new wonderful discovery, good for flowering plants of all kinds, vegetables, shrubbery, lawns, fruit and shade trees, etc. It contains an abundance of active plant food in a condensed form, and a trial with its consequent results will fully demonstrate its wonderful qualities. It matures a crop two or three weeks earlier, largely increasing the same, greatly improving it in every detail. It is, in fact, to plant life what blood is to human life, and enters the life of the plant as electricity does the wires. It is easily applied; no odor, and gives immediate and lasting results. To vegetable growers BONORA is a veritable boon, as attested to by the high-class endorsements we are daily receiving. A trial will convince the most skeptical, and once used you will never be without it. Dry form, all size packages, as follows:

## Nitrogen Culture or Nitrogen-Collecting Bacteria

## THE UNITED STATES DEPARTMENT OF AGRICULTURE SAYS:

"It is worse than useless to attempt to grow any leguminous crop without being certain of the presence of the bacteria which
enables the plants to fix. free nitrogen. Certain regions are pracenables the plants to fix. free aitrogen. Certain regions are pracmeans of inoculating the germs be resorted to the crop will be a failure.'

Where intelligently applied, and the application made where nitrogen is needed, all other things being equal, without an exception the results have been most flattering, and we feel justified in continuing to place this material on the market.

The theory is an absolutely correct one, and we anticipate in the near future a great increase in the use of this Nitrogen-Collecting Bacteria. The mere fact that where Cow Peas are planted in the same hill with corn, a better crop is the inevitable result. The erer, has the faculty of abstracting from the atmosphere this needed plant food by means of the bacteria contained in the nodules, placing
in direct contact with the roots of the corn.
WILL INOCULATE SEED, in limited quantities, for our customers, at a moderate cost, but we must have several days' notice. Always state number of acres and kind of seed you wish inoculated.

Cultures are furnished for the following named seeds only:
(Those carried out on the same line require the same bacteria.)

Alfalfa, or Lucerne.

## Red Clover.

Alsike Clover, White Clover.
Crimson. Clover.
Burr Clover.
Field Peas (Canada Field
Peas).
Garden Peas.
Sweet Peas.

Cow Peas, Whip O' Will Peas and Clay Peas.
Garden Beans, including Kidney, Wax, String, Lima and Pea Beans.

## Soy Beans.

Velvet Beans.
Vetch.

## A MISUNDERSTANDING.

When this method of obtaining nitrogen from the atmosphere was first agitated and placed experimentally among farmers in various sections of the country, the result was so gratifying that others, not thoroughly understanding all the conditions attendant upon the proper applications, jumped to the conclusion that any soil upon which the bacteria were applied would produce like results. They did not stop to consider that where there is sufficient nitrogen no more can be taken up by the soil, in consequence apparent failure was the result. Again, some have imagined that these bacteria would of themselves alone fill all the requirements of the soll, without the knowledge perhaps that other chemicals must either be in the soil or applied, such as phosphoric acid, and some form of potash, either or both.

Do not lay the blame of failure on the inoculation of the seed when bad seed, improper cultivation and unfavorable weather conditions are the real causes. Failure is almost certain where the directions are not carefully studied and intelligently followed. In the use of cultures for inoculating the farmer should be guided, as in all other matters pertaining to soil. treatment, by his own peculiar needs and should not give too great weight to the experiences of others whose soil conditions may differ widely.
PRICES:-Special Garden Package, each, 25c.; $1 / 2$ acre, $\$ 1.00$;
1 acre, $\$ 1.50 ; 2$ aeres, $\$ 2.50 ; 3$ acres, $\$ 3.00$; 5 acres, $\$ 5.00 ; 20$ acres, $\$ 18.00$, and 50 acres, $\$ 40.00$.
Always state when ordering the kind of seed to be inoculated, as well as number of acres. This will save much. delay and trouble.

Cultures will keep one year from date of shipment, and can be used within that time.

# DAHLIAS 

THE FOLLOWIVG NAMED VARIETIES SUPPLIED IN POTTED PLANTS ONLI.
(Ready April 15th.)
Prices by the dozen and hundred are by express, not prepaid.

## Sou. de Gustave Douzon (Cut $\frac{2}{4}$

## (THE KING OF ALL DAHLIAS.)

The cut gives only an idea of what this magnificent flower really is, but does not, do it justice. It should be seen:in nature to be fully appreciated

When perfect the bloom measures 7 inches across, with some of its petals 3 inches long by $11 / 2$ inches wide

It should be called the king of all, as the word king seems to apply to something far above the ordinary. Its color is a very attractive shade of orange red, flowers of fine and symmetrical form

All lovers of Dahlias should have it in their collection. It is impossible to give an exaggerated description of this grand flower. Price, 60e, each; $\$ 6.00$ per dozen.

## BULBS FOR SPRING PLANTING

GLADIOLUS.

## GLADIOLUS

If wanted by mail, add 10c. per doz.
for postage.

THE cultivation of the Gladiolus is very simple, as they will thrive in any good garden soil, but will amply repay one for careful cultivation. A succession of bloom may be had from July to September by planting at intervals from April to June.

OUR GLADIOLUS are from one of the largest growers in the country, and one who has the finest assortment to be had either in this country or Europe; therefore we claim them to be unexcelled as to quality. (all colors).-Dozen, 25c.; \$1.50 per 100 , ANE LIGHT COLORS.-Dozen, 30c.; \$2.25 per 100 .
LEMOINE'S per dozen; $\$ 1.75$ per 100. CHLDSI MIXED.- Extra large and fine. 40c. per dozen; \$3.00 per 100 . TIES.-All first-class varleties, made up largely from best named sorts, including 10 per cent. of Snow White. 5c. each; 50c. per dozen; \$3.50 per 100 .

## CALADIUMS

## CLEPHANT'S EAR.

THE Caladium Esculentum is one of the handsomest of the ornamental-leaved plants. It will grow in any good garden soil, and is of the easiest culture. Where it will obtain plenty of water and an abundance of rich compost. Roots planted in the spring will make good growth in the summer, and in the fall they should be taken up and stored in a cellar. Leaves three feet or more in length and nearly as broad. There is nothing so good as this Caladium for a grand bed of foliage in the garden.
FIRS' SIZE BULBS ( 7 and 9 inches).Each, Јc. By mail, 10c. 50c. per dozen.

…

## BEETLE 4.ROW POTATO DUSTER

Constructed on the same principle as the Champion and Little Giant Dusters.

Four rows of potato vines may be dusted as fast as a horse walks, covering from twenty to forty
 acres of potatoes in a day with one horse, according to conditions of land and weather.

By the wet process it would require from six to twelve barrels of water and two horses to cover the same acreage, besides the double time; in other words, fifty gallons of water is required for three acres, but only Three Pounds of Paris Green when applied dry.

It saves time, labor and material, and does thorough work. The dust is blown down through the vines, so as to reach not only the upper part of the foliage, but all parts. Is always ready for use, and can be operated by an inexperienced person with good results.
The reservoir holds about 30 lbs. of Lime or 40 lbs . Green. The tubes and nozzles may be raised or lowered at will, so as to dust close to the vines. The fan and agitator are con'trolled by a clutch. The tubes and cart wheels are adjustable for wide or narrow rows. The gauge shows how far apart the slots are open, without looking inside, and is opened or closed by means of a thumb screw. The working parts should be kept well oiled. Price, $\$ \mathbf{8 5 . 0 0}$.

## WATSON HIGH PRESSURE 4-ROW POTATO SPRAYER

Entirely Automatic, with Agitator and Brushes which stir the Liquid and Keep the Suction
Fitted with thills for one horse; tank holds 60 gallons.
Double-cylinder pump, each cylinder $21 / 2 \times 8$ inches; separate suction pipes and all working parts are made of brass. No leather valves,

The best automatic mechanical agitator fitted with automatic brushes to keep suction strainers clean, insuring a steady and continuous supply in thorough solution and without clogging:

Wheels 50 inches in diameter, adjustable on axle for rows planted $21 / 2$ to 3 feet apart; 3-inch tire. Axle 17-16 inch turned steel; 3 babbitted boxes, one at the centre of the axle to prevent springing.

Pressure adjustable, 50 to 100 pounds, at the will of the operator by the use of a back-pressure safety-valve, which will enable the
pressure to be gotten up and the mixture thoroughly stirred before pressure to be gotten
commencing to spray. commencing to spray.
A vertical adjustment of pipes and nozzles to allow a privilege of 12
inches up or down; extreme height, 40 inches from the ground.
Nozzles and pipes as shown are in position for spraying four rows of potatoes when the tops are small; may be removed for passing through gates by loosening two thumb serews.

Will spray orchards, shrubs or any crop where it can be moved about and may be readily converted into a hand sprayer.

The Watson will spray from 30 to 40 acres of potatoes, cotton, tobacco or vegetables for a day's work, and without waste of liquid

For horizontal pipe shifter, add $\$ 3.00$ to above price.
This machine can be furnished with 100 -gallon tank at additional cost. It
can also be furnished with one or two leads of hose for orchard spraying.

## HOW AND WHEN TO SPRAY.

Intelligence in application and good judgment are the two great principles that insure success in spraying.

Professor Smith, Entomologist of New Jersey, says in one of his reports that he made a very interesting observation in an application of KIL-o-SCALE made by a local nurseryman. We quote him as follows: "It proved to be an excellent illustration of how spraying is often done. The object seemed to be to get over the greatest number of trees in the least possible time, and whenever the spraying rod has been over as
many movements as might reasonably be required for a covering, the work was considered finished. Such work is bound to be unsuccessful, and it is regretfully coucluded that much of the work done is of the same general character."
In spraying for San Jose scale both fall and spring applications are very advisable; but in cases where it is impossible to do it twice, then the spring of the year is preferable. The advantage in spraying twice lies in the fact that the scale that are missed in the first spraying can be killed in the second

EXPLANATION.-Whenever an Asterisk (*) is used it cautions against spraying with poisons while the plants are in blossoms. A Dagger ( $t$ ) indicates that there is danger of making an application within three weeks of the time the fruit is to be used as food.

## KIL=o=SCALE Still Forging Ahead. <br> 

 are fully prepared to promptly fill all wants.In consequence of our increased facilities for manufacturing, we are enabled to somewhat lessen the cost of manufacturing, and in consequence we give the consumer the benefit by lessening the price to him.
 CIENCY and WILL NOT DECREASE THE QUALITY.

## DESCRIPTIVE.

$\mathrm{KID}=\mathrm{B}=\mathrm{S}$ © $\mathrm{A}_{\mathrm{A}} \mathrm{S}$ is a scientific Chemical Compound; is a perfect remedy against San Jose Scale; dissolves the wax which ements the scale or protecting cover of the insect to the tree; contracts the scale or coating covering the insect, thus exposing the insect itself to the direct action of the insecticide; forms after spraying a coating which prevents any young scale from settling before they die from exposure; fills the respirative and digestive organs of the insect, thus destroying life; after applying to the tree, generates in drying a poisonous gas, absolutely destructive of insect life; is made and shipped only in concentrated form, and will mix with cold water in any proportion; is economical; is easy to apply; is not a mixture of chemicals, but a chemical product, resulting from, a definite chemical process; KIL-o-SCALE is not a "Quack Remedy", but is prepared for the specific purpose of killing the San Jose Scale; will not clog the spray pump or nozzle; may be used in the late fall and during the winter and early spring, up until the buds swell. Will not injure the trees.

## DIRECTIONS.

KUL= (Q)S CALE is a concentrated LIQUID and is shipped in barrels, To one gallon of $K \| H=O=S$ CRLE add 20 gallons of cold water and

SOLUBLE OLL 95 PER CENT.
A high-grade article of 1.424 specific gravity
While we know it does not compare in efficiency with KIL-o-SCALE, yet there are a number of fruit growers who are
using it under various trade-mark names; consequently we using offering it for a cheaper spraying solution. It will readily mix with hard or soft water in any proportion. Limestone water does not affect it. Mix 20 gallons water with 1 gallon Soluble Oil, and it is ready for use.

GOOD'S CAUSTIC POTASH WHALE OIL SOAP
Ts considered by all who have used it the best Whale Oil Soap on the market. It dissolves readily in cold or hot water and in any desired proportion. Remains in solution and does not Apply for green fly or aphis, one-half ounce to gallon of water; one ounce for mealy bugs and two ounces for most greenhouse scale. Outside purposes, double the strength for same kind of pest. dormant trees. For trees in leaf, one pound to the gallon is a safe spray. Price, one-half pound, 8e.; one pound to five pounds, per pound, 12e.; 15 pounds, per pound, 9c.; 25 pounds,

 BARRELS, PER GALLON, 85e.

Gi\&TArsenate of Lead.
Recommended by the United States Agricultural Department and the State Experiment Stations as an inState Experiment Stations as an insecticide of great value, and equally advantages over Paris Green are its cheapness; no burning or caustic effects; easier to dissolve; more adhesive, and lasts longer. The expense of land plaster or gypsum is done away with Apply 2 to 5 pounds to 100 gallons of cold water and spray. Put up in packages of $1,5,10,20$ and 50 pounds.

The great adhesive qualities of Arsenate of. Lead make it superior to Paris Green. One application sufficient, when three or more applications of Paris Green are required.

It is the best insecticide for potato bugs, codling moth, canker worm, rose bugs, grape worm, cucumbers and melon beetle; in short, the best for all biting insects. Price, one pound, 25 e. Two pounds, 50e. Five pounds, \$1.00. Ten pounds, \$2.00. Twenty pounds, \$3.80. Fifty pounds, \$9.50. For 100 -pound kegs, and barrels, 400 to 600 pounds, price on
application. of Lead with Bordeaux Mixture is preferred to Paris Green.

## FORMULAE FOR MAIKING INSECTICIDES.

## BORDEAUX MIXTURE.

Copper sulph Quicklime Water Dissolve the copper sulphate by putting in a bag of coarse cloth and hanging this in a vessel holding at least 4 gallons, so that it is just covered by the water. Use an earthen or wooden vessel. Slake the lime in an equal amount of water. Then mix the two, and add enough water to make 40 gallons. It is then ready for immediate use, but will keep indefinitely If the mixture is to be used on peach foliage, it is advisable to use an extra pound of lime to the above formula. When applied to such plants as carnations or cabbages, it will adhere better if about a pound of hard soap be dissolved in hot water and added to the mixture. For rots, molds, mildews and all fungous diseases.

## COPPER SULPHATE SOLUTION.

Copper Sulphate............................ 1 pound.
Wapper
Dissolve the copper sulphate in the water when it is ready for use. This should never be applied to foliage, but must be
used before the buds break. For peaches and nectarines, use 25 gallons of water. For fungous diseases.

AMMONIACAL COPPER CARBONATE.
Copper Carbonate
Ammonia enough to dissolve the copper

## Water

The copper carbonate is best dissolved in large bottles, where it will keep indefinitely, and it should be diluted with water as required. For the same purpose as Bordeaux Mixture.

## Spray with KIL-0-SCALE. <br> KEROSENE EMULSION.

Hard Soap
1/2 pound.
Boiling water
1 gallon.
Kerosene
2 gallons.
Dissolve the soap in water, add the kerosene, and churn with a pump for 5 to 10 minutes. Dilute 10 to 25 times before applying. Use strong emulsion for all scale insects. For insects which suck, as plant lice, mealy bugs, red spider, thrips, sects which suck, as plant lice, mealy bugs, red spider, thrips, bark lice, or scale. Cabbage worms, currant worms and all
insects which have soft bodies, can also be successfully treated.

## COTTKIL=WEED

WILL DESTROY BREEDING GROTVDS OF MOSQUITOES.

For Golf and Cricket Grounds, Parks, Driveways of Private Hesidences, Streets, Ete.
A SCIENTIFIC WEED DESTROIER. FREE FROM ODOR Kil-Weed, by analysis, is as strong as the strongest weedkiller on the market.
The attention of Street Cleaning Departments is called to this Solution. All organic growth is destroyed. No more digging and disfiguring of paths and roadways. Saves ex-
pense of several men. KIL-WEED not only kills weeds, but pense of several men. KIL-WEED not only kills weeds, but destroys seed germs and roots of plants. The hest time tinary sprinkling can. One gallon KIL-WEED will make 50 gallons treating liquid when mixed with water. While we recommend a 50 to 1 dilution, yet under certain conditions a stronger Solution should be used.

COPPER SULPHATE OR BLUESTONE.
Prices on this article are constantly varying

## SLIDING KRAUT CUTTER.

## Sliding Kraut Cutter, With Two, Three or Four Knives

These Kraut Cutters are constructed on the same principle, but are a decided improvement on the old style machines. Each knife is independent of the other and can be quickly adjusted to cut fine or coarse at will.

No. $50-2$ Knives, $8 \times 26$ Inches.
No. $65-3$ Knives, $8 \times 26$ inches
No. 70- 3 Knives, $12 \times 36$ inches
No. $75-4$ Knjues, $12 \times 36$ inches.

In the old-style kraut cutters the knivos could rarely be adjusted just right, and if they were they probably refused to stay. These Cutters are made of heavy hardwood and are fitted with a hardwood box which runs in grooves. Knife adjustment is perfect, being controlled with $5 / 4$-inch roundhead stove bolts.

# G GRIFFITH \& TURNER CO. 亿0 

## BALTIMORE CEDAR WASHER

## ELECTRIC WELDED WIRE HOOPS.

THE Baltimore Washer is constructed of the best white cedar, very strong, nicely finished and is one of the largest round Washers on the market. Round, electricwelded hoops of extra heavy galvanized wire, fitted in a groove around the machine, which prevents them from dropping off. The Baltimore is supplied with improved gearing, and all the castings are japanned. The inside is fully corrugated, similar to a washboard, having no nails or block of any kind. The bottom and sides are corrugated; in others the corrugation runs only the length of the staves, thus making crevices for dirt and allowing the steam to escape through the top and water to leak through the bottom. The bottom of the tub is larger than the top, allowing plenty of room for water and clothes. In this machine is placed a square galvanized plenty of room for water and clothes

Instead of using a square wooden post to work the dolly (that is, the circular wooden revolving head that holds the clothes in position), in this machine is placed a square galvanized iron rod fastened firmly to the dolly. The whole arrangement can be lowered or raised by the operator without removing the tops, and it will also accommodate itself automatically to the quantity of clothes, rendering it impossible to tear the most delicate fabric, as this offers nothing to which the clothing can catch. OUR SPECIAL PRICE.
. $\$ 4.50$

## ORIOLE CEDAR WASHER.

THE ORIOLE is precisely the same in construction as the Baltimore, described above, and while made of cedar the wood is not selected with the same care. While the Baltimore is finished in natural wood, the Oriole is painted. We recommend it as a first-class machine for the money.

OUR SPECTAL PRICE
.83 .75

## THE MARYLAND WASHER.

To meet the demand for a low-priced Washer, we offer the Maryland, which is made of pine instead of cedar, but in all other respects is the same as Baltimore Cedar, shown above

OUR SPECIAL PRICE.
GRIFFITH AND TURNER IMPROVED CEDAR ROTARY WASHER, No. 2.

## ELECTRIC WELDED WIRE HOOPS.

$I^{1}$7 IS A FACT unquestionable that white cedar is the only wood known that successfully resists the action of water, as witness, white cedar shingles and posts oftentimes last for a hundred years. Ninety per cent. of the washtubs used are made of cedar because they are preferred. That being the case, why should not cedar washing machines also? This is the lightest-running and easiest-working washing machine made. Roller bearings; no friction. Works in both directions. Very simple; nothing to get out of order. The tubs are made of selected VIRGINIA. WHITE CEDAR, and are nicely corrugated on sides and bottom. The hoops are made of galvanized wire, and are welded by electricity. These are much stronger than the old style fiat hoops, and CANNOT DROP OFF, being sunk in grooves.

## RELIEF WRINGER. <br> IRON FRAME. THE FRAME IS MADE ENTIRELY OF WROUGHT AND MALLEABLE IRON.

By the use of the thumb-nuts and spiral springs in this Wringer the pressure can be adjusted quickly for either heavy or light work; therefore the rolls are never overstrained, and will wear much longer than the ordinary iron frame Wringer. With cog wheels. Five sizes. Packed four and six in a case.

It may be attached to any form of outdoor brooder two feet or more in height. to any size or form of colony house, shed, coop, piano, dry goods or organ box. It
also enables those who wish to build their own brooders to get the best brooding also enables those who wish to build their own brooders to get the best brooding
device possible in an economical manner. It fills that want, felt by everyone who raises poultry, for something they can use anywhere, any time, and do the work well.
The hover is twenty-two inches in diameter, the top of which is wood, lined with strawboard, a 4 -inch rim extending downward, to which is attached six inches of felt curtains. The hover stands on three iron feet, but is not stationary and may be raised and moved instantly, if desired
A thermometer is provided, which may be read from the outside without disturbing any part of the brooder. The lamp used is made of metal, using a No. 2 Sun Hinge Burner and a metallic chimney seven inches in length, thus assuring a steady, bright, clear flame; the lamp being on the outside of the brooder in view at all times. Surrounding the hot-air flue or chimney is a fresh-air pipe through which fresh air, slightly warmed, is injected into the upper part of the brooder. This diffuses downward and through the curtains, thus furnishing a perfect system of ventilation. At an additional cost of $\$ 1$ to the regular price a standard wafer regulator may be attached to the hover, by the use of which a uniform temperature can be maintained without close attention. It is not essential, but a great convenience during the cold, changeable weather, and greatly aids the operator in supplying the desired conditions for newly hatched chicks, relieving him of any cause of worry concerning the brood
CNIVERSAL HOVER-Price for hover, with lamp case, smoke conductors
When used indoors alone lamp case is not required
Hover and lamp, with smoke pipes.
With regulator attached, $\$ 1.00$ extra $\$ 10.00$.

STATE BROODERS No. 5 INDOOR BROODER

PRAIRIE STATE BROODER No. 5 is used as an individual indoor brooder in a continuous brooder house of any size, or it may be used during spring and summer in a large colony house, as it is portable. In the large brood house for winter rearing, it is used in connection with a hot-water heater and pipe system. The No. 5 Brooder consists essentially of a Universal Hover, mounted upon a platform eight inches high and thirty-six inches square. At one end of this platform is the lamp-case, which is closed by a door with a glass opening and mirror, so that the operator can see the flame at any time without stooping and make the adjustment from the outside without opening the lamp-case door. Upon this platform rests a removable case sixteen inches high, made of $1 / 2$-inch tongued and grooved boards, the ends of which are fitted with glass openings covered with slides so as to secure direct ventilation when desired. The top of the case is covered with a hinge wire screen, and this in turn with a loose cotton-cloth screen that may be used wholly or in part, depending upon the outside temperature. The Universal Hover lifts out instantly for cleaning purposes or for the examination of the chicks. Provision is made for piping away the smoke from the hover, so that the air in the brood house is pure and sweet, no matter if several hundred brooders may be in operation in the brood room. This is the most practical indoor brooder that has been devised to date, and is used very extensively by progressive poultrymen, many of them having discarded their pipe systems and installed this system of brooding.

## THE COMBINATION COLONY BROODER, No. 1

This Brooder House is constructed of tongued anf grooved boards. The brooder is full size in all dimensions, 3 feet wide, 6 feet long and 3 feet high in front and 2 feet in rear, with tin roof. The interior is divided by a movable partition into two compartments-the nursery room and the exercising room or sun parlor. The nursery is double walled, top and sides, with dead-air space and paper insulation between the board partitions, securing warmth and uniform temperature. A strong point in the nursery is the circular hover without obstructions of any kind, such as hot drums or domes, leaving every inch of inside space available for the chicks. It is open all around. No cold corners or hot spots to crowd into A glass door in front, 22 inches wide, fur-
nishes light and access to the chicks. A movable board under the door nishes light and access to the chicks. A movable board under the door brings the opening level with the floor of nursery and permits easy cleaning of the apartment.

No. 1-Colony (Outdoor). Weight, crated, 300 lbs. $\$ 18.00$.

No. 2-Colony (Outdoor). Weight, crated, 208 lbs. \$14.00.

## THE COMBINATION COLONY BR00DER, No. 2

This Brooder is similar to the No. 1 in construction and is 60 inches long, 30 inches wide, 20 inches high in rear and 30 inches in front.
The interior is divided into two large compartments by a movable partition-the nursery room, and the sun parlor or exercising room; the floor throughout being on a level and 8 inches from the ground. Between the nursery and exercising room is an opening 18 inches wide, with a wooden door hinged to open and close at will, so when desired the chicks may be confined in either apartment. With the wooden chicks may be confined in either apartment. With the wooden slitted for easy passage of the chicks back and forth. Two glass doors, $26 \times 14$ inches, furnish access to the chicks confined. A movable board below the glass door brings each opening level with the floor and permits easy cleaning of each apartment.

## THE COMBINATION COLONY BROODER, No. 3

The sanitary condition of this brooder is perfect, all parts of the brooder being instantly accessible.

The hover is 20 inches in diameter, of the Universal type. It lifts out, and is provided with a thermometer, by means of which the temperature can be taken without opening the brooder.

The brooder is 27 inches wide, 48 inches long, 19 inches high in the rear and 28 inches high in the front. The lamp is placed in the same position as with the No. 2 Colony Brooder, and burns steadily under most stormy weather of wind or rain.

Heat Regulator attached to any of the above Brooders, $\$ 1.00$ extra.

## $\frac{\text { G GRIFFITH \& TUR }}{\text { MODEL INCUBATORS }}$

.,"manamurnca
In one short season the Model Incubator won first rank among practical poultry men-men who are in the business for a livelihood, not only at home, but in foreign countries. That this should have been done in so short a time proves conclusively the superior merit of the Model Incubator. In the design and construction of the Model Incubator Mr. Cyphers drew from the experience gained by him in the past seven years, during which time he manufactured many thousands of machines, which have gone into many countries and been operated under every climatic condition. While we have not the space here to describe in detail the construction of the Model Incubator, we will state that in its construction the best ideas only are employed, and while Model Incubators may be a little higher in price than some other makes, still the purchaser can rest assured that when he buys the Model Incubator he gets good value for his money, and results obtained with the Model will soon convince the user that in incubators, more than in almost any other machine, the best is the cheapest. Two features which stand out prominently are the Improved Smokeproof Heater and the Regulator. The new Thermostat is designed with a view to the largest movement compatible with uniformity, and it excels anything of the kind ever before offered the public. Anyone interested in the purchase of an Incubator will do well to write to us for special catalogue, describing in detail the construction of the Model Machines. It is mailed free on application and will prove interesting to any poultryman.

## COLONY" BROODER

An entirely new creation which won the most general approval ever given a brooder. The points of superiority that were particularly commended were its accessibility for cleaning without removing the chicks, the total absence of hot spots and draughts in the nursery and the light and cheerful wholesomeness of both the nursery and exercising compartments. The most satisfactory feature was the report from customers that they had successfully reared practically all the chicks placed in it.
Every precaution has been taken to make this brooder substantial and durable. The roof is covered with tin. It is well painted and presents an attractire appearance. Size $3 \times 6$ feet. Price, $\mathbf{\$ 1 5 . 0 0 .}$

## "THE MODEL" INDOOR BROODER

Made both single and double. The latter designed to take the place of sectional brooders and are very much more successful. The conditions both in the hover and in the nursery are perfectly normal, and the chicks thrive and grow.

## PRICE

## all grain and no grit.

This feed is formulated from pure, sweet grains. Only those grains are used that are of known value for producing eggs. This is the feed for the poultryman who feeds for profit. $5 \mathrm{lbs}, 25 \mathrm{c} .25 \mathrm{lbs} ., 85 \mathrm{c}$. $100-1 \mathrm{~b}$. sacks, $\$ 2.50$.

## CRACKED BONE FOR POULTRY

This article is manufactured from fresh, clean bones, and is perfectly pure and sweet. No chemicals whatever are applied to them in the course of manufacture. Should be fed to the poultry daily, like grain or any other feed. An excel-
lent bone and egg producer, keeping the fowls strong on their lent bone and egg producer, keeping the fowls strong on their valuable for young and grown chicks. We carry two sizes, No. 1 for growing fowls and No. 2 for young chicks. 5 lbs ., 25c. 10 lbs., 40c. $50-1 \mathrm{~b}$. sack, \$1.50. 100-1b sack, \$2.50.

## BONE MEAL FOR POULTRY

For mixing once a day with soft feed this is unsurpassed. Laying hens and young chickens whose digestive powers are not strong are much benefited by this, especially during winactly the same as the Cracked Bone described above, only it is ground much finer. 5 lbs., 25c. $10 \mathrm{lbs} ., 40 \mathrm{c} .50 \mathrm{lbs} ., \$ 1.50$. 100-1b. sack, \$2.75.

## CRUSHED OYSTER SHELLS

This is a most important article for the poultry yard, and should be liberally supplied at all seasons of the year. It aids digestion as well as supplying lime, Experiments have proved that hens supplied with oyster shells lay more eggs.

We carry two sizes in stock, No. 2 for grown fowls and No. 3 for young chicks. 5 lbs., $10 \mathrm{e} .{ }^{2} 100 \mathrm{lbs}$, 75 e . 500 lbs ., $\$ 3.25$. special prices in larger quantities.

## GROUND BEEF SCRAPS

Our Ground Beef Scrap is specially prepared from pure beef trimmings and is always uniform. Good meat is very important in a poultry yard if the best results are to be ob tained. 5 lbs., 2ธc. 10 lbs , 40e. $50 \mathrm{lbs} ., \$ 1.75 .100-\mathrm{lb}$. sack, \$3.25.

MEAT MEAL.-This is a true egg-producing, flesh and bone forming food, and supplies just what laying hens and growing chicks require. It is not a medicine. It is fed with other foods. Will promote health, growth and vigor. It is the same grade as our Meat Scrap, noted above, only ground finer, and is more suitable for small chicks and mixing with mash food. $5 \mathrm{lbs} ., 25 \mathrm{c} .10 \mathrm{lbs}, 40 \mathrm{c}$. 50 lbs ., $\$ 2.00$. 100 lb . sack, \$3.25.

GRANULATED CHARCOAL, - A little ground charcoal mixed with the soft feed in the morning, once or twice a week, is an excellent corrective for the fowls, and keeps them healthy. We carry three sizes, one for grown fowls, one for small chicks, and pulverized. 1 1b., 10 c. 50c. 25 lbs ., $\$ 1.00$. $50-1 \mathrm{~b}$. sack, $\$ 1.50 .100 \mathrm{lbs}$., $\$ 2.50$.

MICA CRYSTAL GRIT (Poultry, Pigeon and Chick Sizes).Grit is as essential for poultry as food, as without it they cannot digest the food. Few localities furnish enough sharp grit to satisfy them, and if they have been reared on the land for several years all the suitable grit has been consumed. Poultry will starve to death with full crops for no other reason than they have no teeth with which to grind the food into proper consistency. Grit should be mixed with the food and fed in hoppers or boxes, about one part of grit to fifteen or twenty parts of food. 5 lbs ., 15 c . $100-1 \mathrm{~b}$. sacks, 90 e .

Theunderlying
principle of the Calf
Feeder is: The calf
by sucking its milk
takes it slowly and
the mouth with the
milk. Which makes it spongy instead of a sump formed when the milk is gulped down from a bucket.
This is the greatest cause of scours. We have both a single and double feeder. One calf can use the part works independently of the other.

These three sizes stand only 3 , $\$ 2.50$ Additional.
These three sizes stand only 3 ft .6 in . high. The supply
can is still lower.

## SEPARATOR BOILER

Expressly for use with our Tubular Steam Turbine Separators, although any small boiler or feed cooker will answer the purpose, as they require no more steam than The first cost a good-sized straw. The first cost of a Steam Turbine machine and Little Giant Boiler is a little more than the first cost of a corresponding capacity hand separator. Taking into consideration the fact that the former can be conveniently operated for a longer time and larger dairy, and also that the boiler is worth its full cost for furnishing hot water and steam for the many uses about a farm, will commend the same to your careful consideration. These boilers are carefully trimmed and provided with an injector. Price, complete. . . . . . . . . . $\$ 50.00$

## COOLEY

All tanks are built refrigerator style, with paper between the sheet iron and the wood. In addition, it has a compartment or chamber underneath the water tank, through which the milk and afterward the cream are drawn.

## CABINET CREAMER

The transparent pane in front enables the operator to see the cream line. The cream line is not broken up in withdrawing the milk, which avoids all commotion or whirlpool when the milk is running out. A perfect separation is made. The cans are easily removed from the tank when desirable or necessary. They are easily washed without removing. The water tank has inlet and overfiow pipes for running water.

 Cream separator

In some localities people are averse to adding water to milk, putting a two-compartment separator on the marke

Separation is effected by a circulation of cold water in an
outer jacket. All the aream rises to the surface in an hour or two, and is drawn off sweet, suitable for table use or other purposes.

The milk strikes the disc below and spreads out in a thin sheet. The milk receptacle bethis thin sheet of warm milk strikes the sides and hottom,
forces cold air upward through the milk, escaping in sheets from aerator, thus driving out all animal heat or foul gases.

## THE SQUEEZER COMBINED CHURN AND BUTTER WORKER

The idea in this machine is to follow the old method of squeezing butter with a paddle in preference to grinding between rolls, as other butter workers do at present.
One portion of the butter is taken up by a paddle and squeezed against side of churn and another portion by another paddle, and so on. At no point is the butter ground or allowed to stick, thus avoiding marbleizing.
Can be changed from churn to worker or the reverse by action of one lever, and can be done going at full speed.

## CRESCENT WAVE SPRINKLER

It is attachable to any nozzle. Can be operated from the hand. Supports nozzle in position when placed upon the ground. Distributes water evenly and in a showerlike manner.
Permits of full flow from the nozzle, thus lessening the liability of bursting the hose. May be shifted without closing hydrant. No treading on wet grass when shifting. Not necessary to detach when reeling hose. Durable and never out of order.

## BARTON LAWN TRIMMER

Doing away with sickle and shears. No stooping down. Can be worked around where the lawn mower cannot cut; up in corners, along stone walls, fences, around trees, shrubbery, tombstones, etc.
The machine is all ready for use. After a little practice it is easily run; the trimming can be done in a little time and done perfectly.
You get full directions and an emery stone along with each machine, With which it is no trouble to keep
it sharp. $\$ \mathbf{5 0 0}$ it sharp. \$5.00.

This Sprinkler is compactly and strongly made with phosphorbronze bearing, and will cover a surface 48 feet in diameter. As it has a free and unobstructed channel, there is no danger of clogging with dirty water, and therefore it fills the requirements of users of such articles better than the
more expensive and larger sprinklers and will accomplish the same results. The top and arms are brass, full
nickel-plated standard, the base and legs are iron, handsomely japanned.
Price: 12-in. high, \$1.50; 24-in. high, on sled, \$2.50; $36-\mathrm{in}$. high, on sled, $\$ 3.00$.

THE "FOUNTAIN SPRINKLER" made of heavy brass.

Easily moved over the lawn without turning off the water. The mist-like spray is a

## Lawn Mower Repairing and Sharpening.

SND in your LAWN MOWERS early for sharpening and repairing. This department, in season, is run to its full capacity, and in consequence we are compelled to adopt the policy of "first come first served." We wish to urge upon our friends Look over your machines during the winter (this applies to other kinds of machinery as well as Lawn Mowers), and see what repairs are needed. Do not wait until spring work is erowding you. We employ efficient mechanics to do our machine repairing, and turn out jobs in the best possible manner and as expeditiously as the quality of the work will admit. To properly sharpen a Lawn Mower requires someone who thoroughly understands his business, and even though it may be properly sharpened, unless it is adjusted to a hair it will not cut. After we turn out a machine it should be severely let alone, and if it does not cut send it back to us, and do not attempt to adjust it yourself. There is no mower that leaves our shop that is not adjusted to cut tissue paper, and if it does not do the work satisfactorily it is owing to hard usage before reaching its destination. The cheap machines that are flooding the market are made of cheap material and will wear only a short while, and can rarely be repaired at all.

## LAWN SWINGS THE ARCTIC

Made from selected stock, very strong. Chairs have three adjustments. Footrest can be raised level with the seats to form a hammock. Can adapt height of seats for children. Two and four passengers.

## HAND LAWN ROLLER

CAST IRON.
These rollers are especially desirable; they will not dent; wet grass and dirt do not cling to them. owing to their highly polished surface and rivetless ends. Have counterbalance. which holds up the handle and makes it easy to push.

The illustration shows the construction of our 24 and 26 in. 8-foot 2-section steel-rim Roller, With steel spring and seat. This is one of the most popular rollers.

The heads are pressed steel with removable chilled bearings. It also has center hanger and low hitch.
Wood Stave, 2-Horse Land Roller, No. I.

Made of hard lumber, well seasoned and selected stock, made to fit into the edges of the pressed steel head. The whole is held together by three long bolts running lengthwise on the inside of the roller. By so doing the steel heads are clamped together, instead of the pieces being bolted to the head. It is equipped with steel end and center hanger, low hitch and removable low bearings. The axle extends through the roller sections.

## Imperial Pulverizer, Clod Crusher, Roller and Leveler.

List Price, $\$ 66.00$. Retail Price, $\$ 37.50$. SPECIAL DISCOUNT FOR CASH.

The "Imperial" is composed of two sets of hollow-disc rollers which turn upon a revolving axis, one set being placed directly behind and just in the center of the other, thereby covering every inch of ground, and effectually pulverizing the hardest clods, and at the same time subjecting the ground to a pressure and packing the soil a couple of inches below the surface, enabling it to retain moisture, and at the same time leaving the surface loose, mellow and level for the reception of the seed. Most pulverizers tear up the soil and leave it too loose to retain the moisture, or to allow the roots to will press clods beneath the surface, thereby leaving it in a very undesirable condition for the reception of the seed, and if a harrow is put over the field again all the clods come to the surface and the field is as rough as ever.

## The Barker Weeder and Mulcher

Retail Price, $\$ 6.00$.
Operates on the plan of a lawn mower. It is better than
a hoe. It is ten times as fast. It is easy to operate. It forms a dust mulch. Cut your weeds in wour garden it cuts the weeds under the ground as well as the weeds out of the ground. It pulverizes the ground fine which holds the
moisture to feed the plant.
The cultivator attachment is very useful when deeper cultivation is desired. The attachment is always ready for use. It does not have to be "put on or "taken off." It is always on and ready. The tool has only to be turned over to be used as a weeder.

## Griffith \& Turner Co.

I received a postal asking me to advise you in regard to the Weeder which I bought from you some time since. The machine has paid for itself twice over. I am very much pleased with it; it does the work of three men and does it better.

Mt. Washington, Md., Aug. 15, 1907.
Cniversity of Nebraska Agriculture Experiment Station.
Lincoln, June 20, 1904.
Gentlemen :-After having your rreeder and mulcher in use at the Nebraska Agricultural Experiment Station for some weeks, after having personally tested it, I am convinced that it is the best im-
plement for weeding and cultivating vegetables and other similar plants that I have ever seen. We are using it to the practical excluslon of other implements in our garden and nursery fork.
R. A. Emerson, Director.

Union Lock P Poultry Fence.

The horizontal lines of this fence are all composed of two No. 20 heavily galvanized steel wires twisted together Beginning at the bottom, the first 7 cables are $11 / 4$ inches apart, the next three cables are $11 / 2$ inches apart, then 6 cables 2 inches apart, and all above that 4 inches apart This gives a mesh of $11 / 4 \times 3$ inches at the bottom, where it is needed for small chicks, and above 2 feet, where fowls can only reach when on the wing, the mesh is $3 \times 4$ inches. The pickets are No. 19 galvanized steel wire, and are 3 inches apart.

On account of the pickets being at right angles to the cables, this fence will fit any unevenness of the ground without cutting.
Because of its strength and construction, this fence requires no top or bottom rail and no more posts than the ordinary woven wire stock fence, or about one-half the number needed for poultry netting.

In strength, closeness of mesh, adjustability and economy, it is unexcelled. List Retail Retail

## ACME LAWN FENCE.

THE ACME FENCE is made of Special Galvanized wire, No Gauge. This wire is crimped, or corrugated. The uprights are of No. $91 g 11$ carbon steel wire, are only $21 / 2$ inches get through, and also so close that children or grown people cannot get their feet in between and stand on the horizontals
and thus climb-on it. There are 13 horizontal wires in the $31 / 2$-foot fence and a correspondingly greater number in the higher styles.

We paint the fences white enamel, and being made of such large, stiff, corrugated wire, and braided, or woven, together n the manner it is, makes it very pretty, and at the same time practically indestructible

Acme" Fence is usually shipped in rolls of 200 feet each, but shorter or longer lengths can be supplied on order.

This Paint Enamel-besides giving the fence a very neat, handsome appearance, is an aid to the galvanizing in protectment that paint will realiy protect better than galvanizing We carry in stock only two heights, 36 and 42 inches. Other heights from 24 to 60 inches
can be furnished.

## ACME GATES.

They are all of the same style as the ACME LAWN Fars The filling is of the ACME LAWN FWNCING and is, of course, all No, 9 wire. The whole gate, frame, filling and all is painted white.

Retail Price of Single Gates, Including Hinges and Latch. Actual Height Width of Gate, including Hinges and Latch, being
 $\begin{array}{lll}42 & \text { inches........ } & \mathbf{3 3 . 2 5} \\ \mathbf{3 . 2 5} & \mathbf{3 3 . 5 5} & \mathbf{3 . 5 0} \\ \mathbf{3 . 7 5}\end{array}$

Price of double gates same as that of two singles.

## "Pittsburgh" Perfect Electrically Welded Fence <br> The Fence with the famons "Weld that Held" Made out of a specially tested, heavily

 lateral wires, and the joint is indestructible. There are mo exposed ends to invite rust and no wraps to hold moisture, and on account of the elevtrically welded stay the tensile strength of the fence is increased to a very great "xtent. On account of the construction of our fences we alone have accomto get a solid steel fence that is at the same time aljustable to all levels and deflections, and we therefore guarantee that get loose or hold moisture and rust.

SEED
INDICATOR USED ON ALL GENUINE

No. 17

DRILLS.

## Matthews' Newlutuersals ${ }^{+}$Hill and Drill Seeder. No. 16 <br> 

THE SEEDING DEVICE employed on all Matthews' Seeders is set forth in the accompanying illustration showing transparentiy the solld wall of the seed boz. The indicator, which is also shown above, has the names of the various seeds plainly marked upon it The DIAL has a separate hole for each kind of seed. which registers in the CENTRE of the hole in bottom of seed-box. The hole in the dial may be gauged to nicety by means of the REGULATOR, held by a thumb-screw. To lead the seed to the ceniral opening there is provided a CORRUGATED and shouldered bottom, which admits of dropping any quantity of seed, even to a SINGLE PAPEB. The feed is practically a force feed. No other devico ever met with the success of the AGITATOB principle for dropplng all the small garden seeds. The seed is not bruised or damaged by the AGITATOR. The MANUAL CUT-OFF indicated in the illustration by the dotted lines, with its spiral spring connection, is worked from the handle by a wire, and the fiow of seed may thus be instantly checked. No seed need be wasted in turning rows.

 dilll cannot be fitted wlth the attachraents. Our retail price, $\% 7.50$. Litt price, $\$ 9.00$.

##  <br> Vator, Plow, Rake and Harker.

 (he Garden Drill already described with the New Univertal Cuitivating attachment, but it has the advantage of beigg either a double wheel or single wheel implement at will, the change from one to the other being readily made.The use of a one-wheel Seed Sower insuresthe nicer work, as if two wheels are used an obstruction tinder one wheel or the other has a tendency to crook the rows, and this makes after-cultivation harder. the mark made when planting the previous row and presents a sight to keep the rowa straight. The two wheels are desirable, however, when used as a cultivator or wheel hoe, as in this way the rows of Young plants may be straddled and the cultivating done on both sldes of the row at one passing. The special feature of this implement is that when nsed in straddle row caltivstion there is no projection below the frame to interfere with plants. The combination is one which cannot fail of recommending itself to Pair Rakes, One (1) Pair Plows.

List Price, boxed............. \$10.50
Can be used as one wheel or two wheel.

# ${ }^{88}$ GRIFFITH \& TURNER CO. $\frac{20}{50}$ 

va 18. IRON AGE SEED DRILL
One of the Lightest, Strougest and Most Reliable Seed Drills on the Market Price, \$7.50.
No.17. Same tool with the addition of the cultivating tools. Price, $\mathbf{\$ 1 0 . 0 0}$.

No. 6.
Iron Age Combined Double Wheel Hoe Hill and Drill Seeder. Iron Age hill and Drill Seeder No. 8. Price, $\$ 11.00$. For gardeners and truckers who equire a Seed Drill of large seed steel capacity. The wheel is mside of herefoinches high. The Hopper is low o the gre the delivery of the seed is close ormand. The agitator is a revolving rush, which absolutely does not injure ous rows or drop in hills at $4,6,8,12$ or 24 ous rows or drop in hills at $4,6,8,12$ or 24

In the No. 6 Hill and Drill Seeder - is combined a drill seeder with hill dropping device, a double wheel hoe and a single wheel hoe. 'It sows in drills and drops with perfect accuracy all the seeds varying in size from celery to corn. Will drop in hills at $4,6,8,12$ or 24 inches apart.

The Seeder Adjustment in the New Model is accomplished by use of a slide with a pear-shaped opening passing under the bottom of seed reservoir, which is provided with a perforation of similar shape in a reversed position. This size can be instantly adjusted to size indicated by index or to a hair's breadth variation.

## IRON AGE WHEEL PLOW

The names of the principal seeds are plainly shown on the index. The flow of seed can be instantly stopped by a swinging cutc-off. This cut-off prevents all loss of seed.

Price, $\$ 8.00$.

A tool needed in every kitchen garden for breaking ground, opening furrows,
ridging up, covering and plowing.
Also an excellent tool for poultrymen in turning under the droppings in poultry yards.
PRICE.

## Oliver Sulky plow No. 1

Light, durable and effective. Simple and novel device for turning. Plows the most difficult soils and does it well. Can be used with or without tongue. Depth easily regulated. Turns square corners without lifting out of ground. Maders in both right and left hand. No. 11 Sulky Plow, fitted with No.

40 bottom, tongue, neck yoke,
three-horse evener, jointer and weed hook. List, $\mathbf{\$ 7} \mathbf{7} .00$; Retail. $\mathbf{\$ 4 0 . 0 0}$ If fitted with Rolling Coulter instead of jointer, add to price.. For special Four-Horse Evener,
$\qquad$
3.00

With all bottoms fitted with 1.00 shares an extrashare is included in price.

Has all the points of the latest, up-to-date Gang Plow-spring balance features, ease of handling, foot lever-horse lift, extreme flexibility, self-leveling device furrow wheel connection, light draft. Beams are adjustable to be set to turn 12, 13 or 14 inch furrows.
The methods of controlling the bottoms when they enter and leave the furrow give them the same action found in a walking plow. The points of this Gang Plow always enter and leave the furrow first. Thus the Janesville bottoms dip point first into the ground, and on reaching depth wanted automatically level themselves. Without this self-leveling device it is impossible to get these perfect walking plow principles.
There are a number of other excellent devices on this plow which altogether go to make it one of the most up-todate and satisfying implements in use. \$85.00.

OLIVER COMBINATION PLOWS. WOOD BEAM-RIGHT AND LEFT HAND
No. 120-All Chilled
No. 140 -All Chilled
OLIVER SPECIAI PLOWS.
No. 1-Road and Grading Plow, all steel, with Standing Coulter and Gauge

 Is raised or lowered with little or no Is adapted to any soil and every condition of plowing.
Turns to the right or left while plow bottoms are in the ground. Can be backed and handled as easily as a wagon

Is light in draft and perfect in work. In opening a land a square and level furrow is turned.

Wheels are large and the plow runs steadier in consequence. Is fitted with dust and sand proof boxes and caps.

Plows two to ten inches in depth; as desired, at will of operator. CAN BE
USED WITH OR WITHOUT LANDSIDE.

JANESVILLE GANG PLOW No. 2, WITH TWO I2-INCH BOTTOMS, \$65.00. JANESVILLE SULKY PLOW, WITH ONE $12-I N C H$ BOTTOM, $\$ 45.00$.

## 94 c

It handles more cubic inches of soil with less draft than any other plow made; it turns under stalks, trash and weeds completely; it breaks up "hard pan and pulverizes the soil.
It leaves the ground at bottom of furrow porous and natural; it prepares the soil to withstand either a wet or dry season; it insures better crops than any other method of plowing.
It is so simple in design, so few in parts and so perfect in construction that anyone can operate it. It is not a sod plow; it is a pulverizer You cannot pulverize sod. Everywhere else it is all right. Single Disc, with double and triple trees. Price
 Weight, single disc and triple trees. Price.. 60.00 Weight, double disc..................................... 600 pounds.

## THE FIRST CUT SHOWS THE SINGLE DISC.

THE SECOND, THE DOUBLE DISC.
What is said about the single disc pertains to the double, It is only a matter of number of horses. If 100 pounds be added to the draft of the single it will cover the double. It will be seen the difference in draft is comparatively slight.

We guarantee our Disc Plow to do good work, not only in hard, dry and sticky ground, but to do good work in any fallow ground, either clean or trashy; in short, to be good anywhere, at any time, except turf land, and when plowing can be done.

## DISC PLOW EXTRAS

In ordering extras always be sure to give name or number, or send the piece to be duplicated or a correct drawing. Attention to this seemingly small matter will avoid delay.

The breadth of the cast will be accord. Ing t the weight of the seed. - Whest and Bye, 30 to 36 feet-Oats, 21 to 25 feet-Barley, 27 to 33 feet-Olover, Millet, Hunga-leot-Timothy, 15 to 18 feet. oet-Timothy, 15 to 18 feet.

Factory Price, $\$ 3.50$. Our Special Price, $\$ 3.00$ Cash With Order.
CROWN WHEELBARROW GRASS SEEDER.

Made with wood or steel frame, with wire rope feeder; very strong, and will sow accurately the various clovers, timothy, etc. Furnished in either 14 or 16 -foot lengths, Price, 14 -foot, \$6.50. 16-foot, \$6.75.

## THOMPSON'S CLOVER AND GRASS SEEDER.

SOWS 14 TO 16 FEET WIDE, ANY AMOUNT DESIRED PER ACRE.
WILL SOW 20 TO 25 ACRES PER DAY.

This Grass Seeder is simple, without gearing, cams or intricate machinery. It cannot get out of order. It is strong. yet weighs but 40 pounds. Perfection feed is attained in making it absolutely positive, yet a non-leaking carrier when thrown
out of connection: The quantity out of connection: The quantity
of seed to the acre is accurately shown by the index plate.

MANILLA ROPE FEEDER.

> Although this machine has been much improved and simplified in recent years, yet the same general principles which characterized it when sold for from $\$ 10.00$ to $\$ 12.00$ each are still retained. It differs materially and very advantageously from all other Sowers in having a slope feedboard with an oblong hopper which terminates in a metal edge, on which edge oscillates a feed plate which does not allow the seed to become clogged, but makes a positive force feed and insures a uniform flow and even distribution of seed, Anyone desiring a convenient, practical and an all-round first-class grain and grass seeder, a good large sower that will meet the most exacting demands, we cannot recommend the CYcLols too highly. Price, $\$ 1.50$.

The CHICAGO SEEDER, like the CYCLONE, is a strictly first-class machine and will do equally well the same amount and kind of work. In fact, the machines are very similar, and what has been said of one as to quality and-convenience is What has been said of one as to quality and-convenience is tion, the CYCLONE operating with a crank and the CEICAGO with a backward and forward movement of a steel bow through a swivel guide. This machine is sometimes ralled the Fiddle Eeeder. The CHICAGO has few wearing parts, is not liable to get out of order and is generally recognized by the trade as the best Bow Seeder made. Price, $\$ 1.25$.

## National Broadcast Seed Sower.

It will sow wheat, rye, oats, rice, flax, millet, turnip seed, clover seed, grass seed, including light grasses; in fact, all kinds of seed, broadcast. Also plaster, fertilizer, salt, ashes, etc.

Janesville No. 1 Planter with Fertilizer Attachment.

## The Janesville Double Row Corin Planter Mo. 1

The Janesville Planter is made adjustable in width 3 feet to 4 feet. It has a strong frame, disc, marker, adjustable seat, open or concave wheels, plain or stub runners.

Seed Boxes are removable, and the plates may be changed without removing the corn. This also enables the operator to refill the seedcan by taking it to the grain sack instead of carrying the heavy sack to the machine, an exclusive Janesville feature. The time gear for driving the seed plants, together with the removable boxes, are so constructed that you cannot get the seed boxes on the wrong side, nor can you get the driving gear out of time. With our Convertible Drop (see cut) we furnish with each Planter both kinds of plates, so that by simply changing the seed plates you can have either the Edge Drop or Flat Drop. The Flat Drop gives much the best results with mixed seed, and it is sometimes not nvenient to have selected seed corn.
Our Fige Drop is one of the best mechanical devices ever gotten up for the purpose, and operates as follows: The seed plate has cells in the outer edge, each of which is made to-receive one kernel of corn edgewise. A revolving disc working on an eccentric over the seed plate insures the filling of these cells.
The cut-off will not crack the corn. The spring knocker drops in each cell and forces out the kernel. The seed plates are chain driven from a sprocket wheel on the main axle to a sprocket on the feed shaft. This obviates the side draft and relieves the wire strain.
PRICE. - No. 1, Plain, with Check Rower and 80 rods wire, \$42.50. No. 1, same, less Check Rower and Reel, \$37.50.
PLANTER, with Fertilizer Attachment, \$52.50. Any of these planters can be equipped with discs, instead of runners, at $\$ 2.50$ per planter additional.

Valves Adjusted io Hill Drop. of gear until the mort lut
throws the clutch into gear.

## Check-Rower Wire

Carry in stock 3 ft .6 in . and 3 ft .8 in . Price per rod, 6c.
Special Price in Quantity.

The front of the Planter is raised and lowered at will by
means of the hand and foot lift, assisted by a spring lift. This arrangement balances the weight at any point. The pole has a spring under the back end, which gives perfect flexibility.

## Spring Lift and Connection to

## Front Frame.

An adjustment on the pole may be raised or lowered to regulate the set of the check rower.

The Check Head Trip is a patented device which operates entirely different from the former manner in which this was accomplished. A trip bar is fastened on the front frame, and when the planter is raised out of the ground it automatically releases the wire from the planter.

THESE PLANTERS (FIGS, $26 B$ AND 27B) CAN BE FTRNISHED EITHER WITH RIVNER OR PLOW FOR OPENING FCRROW, AND WITH FITHER DOIBLE OR COMCAYE WHEEL, ILSO BOTH WITH AND WITHOET FERTILIZEIR ATTACHMENT. READ THIS CARE: FULLY, AND ALWAYS SPECIFY THE STVLE WANTED.

#### Abstract

In all of these Planters the top part of corn-box is made of heavy sheet iron, riveted to a cast ring which is hinged to the bottom. and wi loosening one thumb-nut can be turned to the side and the rings changed and the bottom cleaned out nicely, On all machines where fertilizer attachments are used the fertilizer box sets lower on the frame, has less number of pieces, less complicated and the most positive force feed of any Planter on the market. Will sow from 20 pounds to 450 pounds per acre, and if a larger quantity is wanted use the five-point chain wheel, and it will, sow 525 pounds per acre. NOTE-If the rows are marked out closer than three feet six inches it will sow more per acre. It has the same dropping device and fertilizer feed as our other Planter. All the Planters we make have the spring trip cut-off in the corn hopper instead of the brush. This is preferable to the brush, as it does not hak any corn and is more durable Thre ("hain IVheels are furnished with plain Planter and four with fertilizer. The six-point chain whell druns one prain 13 inches or two grains ${ }^{2}{ }^{6}$ inches apart. The seven-point drops one grain 15 inches or two grains 30 inches apart. The grain 15 inches or two grains 30 inches apart. The elwht-point wheel drops one grain 34 inches apart. The nine-point wheel drops one grain 19 inches or two grains $3 \lambda$ inches apart. Wh can also furnish rings for planting Peas, Beans, Fnsilign (orn or any kind of steds, and , $y$ using the different chain whetls can mlant any desired am

Has celebrated marks-Fertilizer Feed, Double Disc Opener, Gear Drive for both Fertilizer and Corn.

Special Price for Cash.

## THE GRITCO HAND CORN PLANTER

The cut does not exactly represent the Planter, though very similar. We could not obtain a cut in time for this Catalogue. In the Gritco there is no chance of cracking the corn, beans or other delicate seed, because of the Chinese bristle brush cut-off. No casting about the planter. The stamped steel slide is formed on a segment of the circle, whose center is the pivot of the blades. Means are provided to plant pumpkin seed at the same time With the corn. Slide quickly adjusted for different sized seeds. Galvanized iron hopper, smooth, polished hardwood handle. \$1.25.

## The Gordon Automatic Hand Corn Planter

ITS ROTARY SLIDE has a motion two waysback and forth. It prevents skips, No matter how short the stroke, the pocket is pushed into the corn and back into the conveyor tube,
This motion is positive. It breaks up all bridging and fills the pocket uniformly-it counts the kernels for each drop.
THE IRON STRIPPER will not wear out or break. It prevents an overdose of corn, and will not crack a kernel. The entire dropping device is made of iron, held together by three bolts. All parts are easily accessible and readily
THE HOPPER IS IN LINE WITH THE CENTER. There is a double coll spring on each side, and the Planter
hangs well in the hand. The material hangs well in the hand. The material with a selected hardwood frame, finished bright, a brilliantly painted hopper and all parts varnished.

PRICE, $\$ 1.50$.

## AMERICAN HAND CORN PLANTERS

Are fitted with Sheffield's. famous patent adjustable seed disc and spring brass cut-off. The disc revolves similar to disc used in horse planters, and is one of the best finished and most accurate dropping discs ever used in corn planters of any description. Price, \$1.75.

## 98

## Hench's 20th Century Steel Ball Coupling Cultivator. <br> нис. $\quad$ o

This is a perfect machine for both rolling and level land.
Pivot axle, easy of adjustment, simple arrangement to accommodate the machine for narrow rows. Can be furnished either for pin or spring hoe.
The shovel gangs are coupled in front by steel balls, $11 / 8$ inches diameter, and malleable sockets having larger running surface and no lost motion whatever. This simple arrangement prevents the lateral movement so common in this style of machine, so that, if the shovel happens to strike a bunch of grass, it will not glance around, but will cut it out.
By simply slacking four nuts on the wheel standards they can be moved in or out on the axle, narrowing the wheels from 46 inches, the widest point, to 34 inches, the narrowest point, between the wheels.
Wheels 32 inches high, made of steel, with 2-inch tread, malleable hubs, removable boxes, which can be replaced when worn out. Weight, about 375 pounds.

## PRICES.

${ }_{2}^{2}$ Center Beams and Shovels, Pin Hoe...
2 Standards and Shovels to make 104 -disc Cultivator, with 13 -inch discs. 6 -disc Cultivator, with $13-$ inch dises.
Special Discount for Cash.

The Hench Improved Pivot Axle Cultivator.

Hench Junior Steel Ball Coupling Cultivator, No. 62. With $36-$ In.
The above cut represents our Hench Junior Cultivator, with 36 -inch wheels. It is similar to our Twentieth Century, except the axle standard allows the wheels to pass over the axle, and is recommended where-extremely narrow rows are not cultivated.
It is made with three, four or five shovels on each gang, making it six, eight or ten shovel Cultivator for rowed crops, with a pair of $13 / 4$-inch ball tongues for first cultivation and one pair of hilling shovels for last cultivation of rowed crops.
It can be rigged with two middle beams and shovels, making a 12 -shovel Cultivator for fallow cultivation. It also can be furnished with Double Row Corn Planter Attachment, as shown in the Twentieth Century Cultivator, Fig. 56 (see Page 110).
PRICES.- 6 -shovel Pin Hoe, $\$ 30.00$; 6 -shovel Spring Hoe, $\$ 33.00 ; 8$-shovel Pin Hoe, \$31.00; 8-shovel Spring Hoe, $\$ 3 \mathbf{3}, 00 ; 2$ Center Beams and Shovels, Pin Hoe, make 10-shovel Pin Hoe, \$2.25; 4-disc Cultivator, with 13 -inch dises, \$29.75; 6 -dise Cultivator, with 13 -inch discs, $\$ 31.2$.

## Hench Champion Steel Walking Cultivator.

In the annexed cut is seen our siz-shovel Corn and Fallow Cultivator, with seventh or middle shovel. regulating the shovel beams or drag bars for deep thallow cultivating. its use in high corn and being firmly braced, gives it great stlength We furnish the same patent spring hoe that is used on our riding Cultivators for rooky or stumpy land at small extra cost.

PRICES.

#### Abstract

The shovel gangs are coupled by cone and socket bearing to the axle, which is $6 \frac{1}{2}$ inches in front of the wheel spindles. and when the shorel gangs are raised up the entire frame of the machine drops down about 6 or 7 inches, and this weight, together with the aid of the springs, raises the drag bars without any assistance whatever froan the operator, and holds them up. It is a perfect balance, and will not tilt the tongue up when the shovel gangs are hoisted. The drag bars can be furnished with three, four or five shovels on each gang, making it 6,8 or 10 -shovel Cultivator. These shovel standards can be adjusted or placed at almost any vosition required. It is also made with spring trip shovels, Each machine is furnished with a pair of ta-inch bull tongues and a pair of hilling shovels, in addition to the tongues and a pair of hiling shovets, in adation to the aished with either style of machine.

STEELS FOR HENCH \& DROMGOLD'S RIDING CULTIVATORS AND CHAMPION WALKING CULTIVATORS.

## Janesville Riding Cultivators

Janesville Balance Frame Culfivator.

There is positively no other style of construction so well adapted to take care of the balance of a combined riding and walking cultivator as the Janesville. It balances, whether the shovels are in or out of the ground, and it absolutely does this under any and all conditions.

Besides balancing perfectly at all times, the Janesville has another exclusive feature-it'is thrown from an inoperative position to an operative position, or vice versa; the end of the pole does not have the teeter-toter motion, so prevalent. in some of the constructions now in use. Neither is the changing of the balance of the cultivator from one position to the other accompanied by a general convulsion throughout the whole machine, but glides into perfect balance.
The Janesville is the very acme of perfection as a balancing combined cultivator.

## JANESVILLE DISC CULTIVATOR

Steel wheels; removable dustproof box; disc gangs heavy
construction; chilled wearing boxes in the yoke; light draft angle of the discs and the tilt of the frame accomplished by levers. The one machine that is imitated by other Disc Cul tivator manufacturers.

A hand lever, operated without leaving the seat, sets the gangs at any desired cutting angle and enables the driver to throw as much dirt to the plants as he desires. the position of the shields and levelers

The foot levers, the gangs and the coupling arms that control the tilt of the gangs and shields are positive in thei action, and never slip when set, because they are held by in terlocking teeth.
The yoke boxes in the gang yoke are renewable. It is of the necessary to buy a new gang yoke when the bearings ciated.
The spring pressure feature of the Janesville Disc Culti$v a t o r ~ e n a b l e s ~ t h e ~ o p e r a t o r ~ t o ~ p u t ~ t h e ~ g a n g s ~ a s ~ d e e p l y ~ a s ~ d e-~-~$ As the gangs are hung on springs the guiding is done by foot pressure instead of by shoving sidewise of the discs folment with the wheels, You can run it up close with the young plant without cutting off or wounding the lateral roots, vines, stalks and kills

## 

The original standard lever wheel harrow of the world. Depth easily and quickly regulated by the levers; wheels prevent teeth from gouging. By use of ratchets and levers 15 inches can be worn off teeth before renewing.

This style Cultivator is precisely the same as either half of the regular Spring Tooth Wheel furnish anyone having the regular Harrow a set of handles and braces, and they can be attached to either half. The front wheel is pivoted, and will draw with ease after the horse, causing it to draw straight. The wheels guide it and cause it to run steady, and each tooth will cut its own way, For turning at the ends the teeth can be raised by the use of the lever, and is very easy to operate.

This Harrow has a frame of I beam steel. bars of "L""-shaped steel, well braced and securely fastened at each end to the frame. This gires the Harrow a double advantage, strength and ricidity, and as a ward atrainst catching mond-shape steel. The runners are formed by the curved tooth extension, which are placed so that the Harrow will free itself from trash better and will carry the Harrow more even distance from the ground than any other Harrow on the market. The teeth are held
firmly by a welded eye steel bolt through the clip malleable to roller bar, also the end teeth
 on the roller bars, which locks and holds the lowered as desired, and with the lever the teeth can be set to any pitch or cut desired.

## STEEL "U"' BAR LEVER HARROWV

 SO ARRANGED THAT THE TEETH CANNOT TRACK. This is a "C". Bar" Steel Harrow, with five "U"" bars to each section. The easily remored for sharpening, or so they may be adjusted to make them cut deep or shallow, as desired. The levers permit the teeth to be lowered for smoothing or set forward at an angle to make them do more work and run more steadily, and also allow the operator to unload trash without stopping his team. It is strong and durable; made of high-carbon steel. It is finished nicely, painted and varnished. The heads of the teeth are swedged to prerent losing them, which makes a much more economical and satisfactory Harrow for the farmer to own and the dealer to sell.Price With

## HENCH \& DROMGOLD POTATO DIGGER

The standards are made of cast iron, having on a highly-polished steel share. The side or wing pieces to the standard are bolted with a ratchet, by which they can be adjusted to stand up or down as desired. The fingers extending back from the standard are made in a zig-zag form, instead of straight, as shown in cut, on account of which they separate the potatoes from the ground better than straight ones. They are made of spring steel, and are very elastic and durable.
Price. . . . . . . . . 8.00 Steel Share.
$\$ 1.00$
We also carry Repairs for the Hitchcock Digger.
Steel Point......... \$ .7:
Beam Head......................

## NEW IDEA MANURE SPREADER

It pulverizes the manure thoroughly and distributes the same evenly and in a wide stream.

Should the pulverizing cylinders have missed or not fully fined up a particle of manure, it will get a second pulverization from the rapid rotating distributer.

The machine is a simple and substantial one, having all the weak parts weeded out during the years of testing, experimenting, building and selling them, consequently a timetried machine, a machine made to work and to last, if you take anything like good care of it.

The front and rear axles are connected by a strong reach or coupling pole well braced, same as the farm wagon. No front axle or truck can draw away under the machine when manuring crossways over the field or driving through crossfurrows, ditches and rough places. No strain on the bed, but the draft is on the reach only. Front wheels turn under bed up to the reach, allowing close turns.

It is very simple. You can see all the working parts there are to the machine from the cut. There is nothing hidden or under the machine.

## A MANURE PULVERIZER

DIMENSIONS: Average Capacity 70 bushels. Front Wheels 28 inches, Rear Wheels 40 inches; both 4 inch Tires. Equipped with $\mathbf{2 - H o r s e}$ Hitch.

Extras: Brake, 3-Horse Hitch and Traction Bands.

You can load the machine up to 26 inches in heavy manure and in light manure as high as 32 inches.

Both rear wheels are drivers. Rear axle revolves in wide bearings. Wheels do not revolve on axle except slightly when turning.

A straight all-chain drive with not a cog-wheel, secondary shaft, clutch or additional part in it. Direct pull from the axle sprocket wheel to that of the cylinder sprocket. It will wear out any other arrangement, will not require any particular adjustment or attention as compared with other devices; no clutches to wear out or get greasy and slip over, no cogs to break out.

There is no driving chain or any part of the machine running whilst the machine is set out of gear or going to the field and coming back, a bad feature on any manure spreader.

The machine is always ready for loading, no returning of the conveyor necessary.

It has a double cylinder pulverizing device, thus the lower cylinder can be smaller than that of the single cylinder ma-
chine, and as its lower portion is set below the level of the conveyor, it will carry the last portion of manure in the machine out more readily than machine with one large cylinder is able to do.

It has only two levers-one to set the machine in and out of gear, and the other one to set the feed, which can be regulated to suit during the operation of the machine.

A boy can operate the New Idea as perfectly as an expert. It is an easy draft machine, it being built on such principles. Most powerful driving mechanism, everything simple; wheels track and are close together; the pulverizing arrangement is built to do the work with a minimum of power, it having the two cylinders set for the best pulverizing and with the least friction, the upper cylinder being set so as not to allow any weight of manure on the lower cylinder to act as a brake to that cylinder; the teeth are all pointed round like a pointed lead pencil to enable them to cut and pulverize better, and at the same time keep themselves cleaner than mere blunt pins.

It need not be as carefully loaded for good results as other spreaders.

The conveyor does not rest on steel runners, but drags over the floor, steel runners not being practical. Will not hurt the floor, as there is no weight on the conveyor, as some people may think, as the manure is not carried on the

## A MANURE DISTRIBUTER

conveyor, but falls between the slots and is simply drawn out by them, the manure sliding over the floor. Feed is positive, as the manure falling between the crossbars is carried out by them and cannot slip or slide as on flexible floors.

It has an endless chain conveyor and tight floor, having the advantage of the flexible endless conveyor without its defects. It has not its defects, because the conveyor or apron will not slide under the manure, nor allow the manuie to lodge between the upper and lower portion of the apron and wrap up in the machinery, nor will sloppy manure or water be able to lodge in between and freeze and hinder the operation of the machine.

On account of the solid bottom and chain conveyor, the manure cannot slide on the conveyor, but is steadily fed up, and because the conveyor cannot shift or race when driving through furrows and rough places on account of the jolt, therefore the manure will not get jammed into the cylinder, causing it to stop or throw out a big pile, especially in the light feed.

## GRIFFITH Q TURNER CO.

## Lindsey's

 Compost Drill

Furnished with irow wheels, built di rectly on the tubular axle. The spokes are made of steel and securely looped around the axle. The out ends extend through the rim, and are provided with vats which serve to adjust the wheels and also to prevent slipping. In the center of the axle are four teeth clamped around it, and on each side of these, three inches away, are two other teeth projecting through the axle. There are also two teeth in the frame that pass between the central teeth and the side ones, which help to do the grinding. The front wheel is made of iron and is supported by four braces, two of which have a series of holes, which are used to adjust the wheel to suit depth of furrow. The hoppers, which are 3 feet long, 18 inches wide and 18 inches deep, holding four bushels, on the No. 1, and $31 / 2$ feet long, 22 inches. wide and 22 inches deep, holding seven bushels, on the No. 2, are balanced on the wheels.
The bottom of the hopper is closed by two iron plates which regulate the discharge and are controlled by a lever which is held where left by friction. The teeth are always in the center of the opening.

The draft is about one-half that of a common scooter plow
It is simple, strong and durable. It will do the work of six hands. It will do better work than can be done by hand or any other machine. It does the most laborious work on the farm and at the busiest season. It saves compost as well as time. It is light on man and horse. It pulverizes the compost as it distributes it. The amount can be regulated Without stopping the machine. It works almost anywhere a plow can be used. It works well in any reasonable compost. It can be unclogged without unloading and very often without stopping. It can be operated by any boy who can plow. It has a graduating lever.

Weight-No. 1, 100 lbs.; No. 2, 150 lbs.

THOMAS'
CELEBRATED RAKE.
This Rake has long been known in the agricultural world as one of the best rakes made. It rarely requires any repairs; will rake cornstalks as well as the heaviest hay; has a long and good spring over each tooth; an overhanging cleaner with roller turns the hay in dumping and brings green hay on top.

Price \$21.00. Special price for cash. THOMAS' RELIABLE STEEL RAKE. $8 \mathrm{ft} ., 20$ teeth, $\$ 22.9 \mathrm{ft.}$,23 teeth, $\$ 23$.
 are only 16 inches ciple to prevent friction, wear and breakage, and applied so as to increase the leverage as the hay is more compact, and thus to increase the leverage as the hay is more compact, and thus
reduce the strain on the horse to a minimum. Capacity is not governed alone by packing capacity, but also by the not governed alone by packing capacity, but al
amount of hay that can be put in.
Priee $\$ 75.00$. Special Price for Cash.

Cut shows general appearance. Well braced front and rear. Direct gearing from drive wheel to erank. Rakes 6 or 8 feet wide, light draft. Takes hay direct light windrows, but is not a windrow loader. Fork protectors to prevent digging into the ground. Specially constructed crank support to hold crank loose. Driver can unhitch loader from wagon without getting off the wagon. We invite inspection. Price $\mathbf{\$ 6 5 . 0 0}$

## GRIFFITH Q TURNER CO.

## The York Grain and Fertilizer Drill.

BOTH the grain and fertilizer are positive force feeds, and will sow with absolute regularity any kind of seeder is also a force feed, and can be used either in front or rear of the hoes: also quantity can be changed to any amount necessary. It is fastened on the frame and very low down, thus preventing the wind from blowing the seed away before reaching the ground. The fertilizer feed can be stopped or started at any time while the drill is in motion, which makes it convenient in case the operator does not wish to sow fertilizer while going over good ground.

## The Thomas Disc Fertilizer Drill.

THE Celebrated "Marks" Fertilizer Feed is used on this Drill. The device for changing quantity is entirely new speed and has been thoroughly tested, and consists of a sirpere flow is stopped automatically when the discs are raised. When spotting shocks in sowing corn ground, can be thrown out of gear without raising the discs. DISC Boot.-Our Delivery Disc Boot is specially designed and very complete, and prevents choking or clogging in any soil. There is a chilled iron spindle, which will last for years, if it will ever wear out. The scrapers for discs are of spring steel, and are adjustable 8-Disc Dr11........ $\$ 80.00$ 10-Disc Drill........ $\$ \mathbf{8 0 . 0 0}$ 9-Disc Drill...... $\mathbf{8 5 . 0 0} 11$-Disc Drill....... $\mathbf{9 5 . 0 0}$

## New "Ohio" Shredder

Our new shredder blade successfully reduces the fodder to the proper condition with the same power, speed and capacity as the regular Ohio knives. Interchangeable on all sizes with the knives. Nothing extra but the shredder blades. Least cost, best results. Does not pulverize the leaves like saw-blade or tooth-shredders, but splits and tears the stalks perfectly. The greatest saving in this new shredder is that perfect Work can be done running at normal speed ( 600 to 700 revolutions), which means that the same power that runs the cutter will run the shredder.

PULLEX-Furnish an $\delta$-inch diam., $6 \frac{1}{2}$-in. face pulley, unless pecial size ordered, which can be furnished without extra charge. SPEED.-Steam power, 1000 to 1200 .
CAPACITY.-Ear corn, $\&$ to 18 bushels. If corn is new or wet, the work can be done, but not so fast. Shelled corn. 8 to 20 bush-
els per hour. All kinds of small grains separately, or corn and ai miser pounds. Price of Mill, Complete, with Extra Set of Plates, $\mathbf{\$} \mathbf{6 5} .00$.

## STYLE L.-No. 1.

Has double breakers, with partition hopper, pin breaker and safety bottom. It grinds ear corn with shucks on, shelled corn, separately, any two or more mixed, for feed. GRINDIVG PIATES.- 12 inches diameter, of extremely hard metal, and very durable. Are reversible and self-s

POWER.- 6 to 10 horse steam power.
PULLEY. - 8 -inch diameter, $6 \pm / 2$-inch face; can furnish larger if desired, without extra charge.

SPEED.-Steam power, 1000 to 1200 revolutions per minute. hour; with shucks off, 15 to 30 bushels. If corn is new, wet or frozen the work can be done equally as well, but not so fast. separately, or corn and oats or other grains mixed, 15 to 30 bushels per hour. Weight, 560 pounds. PRICE, \%75.00.

## THE SCIENTIFIC CORN AND COB MILLS

Prices on Power Mills Subject to Specinil Discount.

Scientific No. 5 Triple=Geared Sweep Mill

## semation me

 No. 6, excep similar to the scientific out tilting hopper about one-third less capacity. Mounted on a box. Very convenient. Double action, easy unning. Complete in erers particular Does irst-class work. The best on the market at the price. Weighs grinding plates, $\$ \mathbf{3 9 . 0 0}$.pecial Discount for Cash.
We also carry a plain sweep power mill. Single action Grinds successfully ear corn and all kinds of small grain. One or two-horse, capacity about 5 to 8 bushels per hour. Weighs about 400 lbs. Price, \$20.00. Special Discount for Cash.

Scientific No. 6 New Geared Sweep Mill DOUBLE ACTION.

Its gearing consists of three gear pinions, which revolve on independent chilled studs. The mill grinds all grains, but is especially effective and rapid on ear corn, and our double-action feature,
which is applied to these mills, prevents any cobs lodging in hopper at the end of a run. Its capacity is 10 to 15 bushels per hour. Weight of mill, 700 'pounds. Price of Mill, with extra plates and two

one grinding plate makes 30 revolutions to one round, the other one revolution with each round of team. The grinding plates revolve in opposite directions. Power attachment is furnished so that a corn sheller, feed cutter, saw or similar machines can be operated when grinding is done; plates can be removed and mill used only as a power; $15-\mathrm{ft}$. tumbling rod with each attachment; we furnish pulley $15 \times 4,20 \times 4$, or 24x4; tumbling rod makes 58 revolutions to one round of horses.

Shipping weight, 1050 pounds. Length of Sweep, 12 feet.
Capacity-Small grain, 12 to 18 bushels per hour, 2 horses; 10 to 15 bushels of ear corn, according to condition of grain and fineness of feed; proportionately increased with 4 horses.

Price of Mill for Small Grain and Lar Corn, Complete with Two Levers, \$65.00. Special Discount for Cash.

## ALAMO GASOLINE ENGINES

## A TRIUMPH IN GASOLINE ENGINE CONSTRUCTION.

In the construction of the Alamo Ideal Portable Gasoline Engine the requirements of the farmer have been carefully studied out by the Alamo Manufacturing Company's best engineers, and they have produced an Engine that is just right. The well-known Alamo Carbureter is used, insuring a perfect mixture and an economical use of gasoline The valve mechanism is simple; vertical valves of poppet type are used. Simple igniter, with convenient device for retarding spark. Hit-and-miss governor of approved design. Heavy split-hub flywheels. Broad bearings, inclined at an angle and babbitted with best grade anti-friction metal. Forged crank and connecting rod. Alamo Ideal Engines are equipped with our Improved Pan Cooling Device with circulating pump. This is a splendid feature. No other engine has it. They are also equipped with high-grade Friction Clutch Pulley.

## Alamo-Victor Vertical Engine

Designed to meet the wants of those desiring a light but powerful Engine. The same high quality of design, material and workmanship that has always characterized Alamo Engines is shown. Just the thing for running a little fodder cutter, grinder or wood saw. Built in two sizes- 3 and 6 horse power; mpunted on skids, and are easily moved from place to place.

The Victor Vertical governs automatically, and can be run at a. wide range of speed. In economy, the Victor easily shows superiority: The mixing device or carbureter gives just the proper proportion of air and gasoline to form a perfect charge

When the Victor Vertical reaches the customer it is properly tested, correctly adjusted and ready to start at a turn of the wheel.

## "New Model" Pumping Engines <br> SIMPLE. <br> RELIABLE. <br> CONVENIENT. <br> ECONOMICAI

These Engines are strong and durable, built of extra heavy castings. Nothing but the best of materiais enters into their construction. These Engines are not experiments, but are built along well-established lines of good engine construction. They are of the four-cycle tyne, which is by far the most satisfactory. They are provided with pump feed, have hit-or-miss governor, latest improved hammer-break gniter. The New Model Engine is extremely economical in fuel and is a good power developer. It is very simple, easy to start, and it is an Engine that we can guarantee and recommend to our customers
"VEW MODEI." To. 1-This is a $2-\mathrm{H}$. P. Engine suitable for all $2-\mathrm{H}$. P. farm work; occupies a space of $37 \times 22$ inches; has a pulley six inches in diameter with 4 -inch face, and, when crated for shipment, weighs 500 pounds. Price

RE-THREADING ATTACHMENT WITH INTERCHANGEABLE DIES.

## It Can Be Attached to All of the Elgin Wrenchem

 of 1905 Pattern.Price of attachment with one die retail price, 75c. each. Extra dies, retail price, 40c. each. It is a Racheting Attachment and will re-thread damaged bolts in corners and angles without removing the bolt from its position to a vise. Extra dies can be had in 1-4, 5-16, 3-8, 7-16 and 1-2 in. MONKEY WRENCH PIPE JAW.

When there is only a little work to do (not enough to warrant buying a pipe wrench) "The Elgin" Jaw on a monkey wrench will do it.
12-inch monkey wrench.

THE "ELGIN" ADJUSTABLE WRENCH.
Both Jaw Hardened. Length 7 Inches. Wrench is All Steel. Weight 10 Ouncer.
It will fit a pipe up to $3 / 4$ inch or a nut that is $11 / 8$ inches across. Adjusted to fit the articles; you get all the leverage and no ends to interfere. Price, 75e. each. Extra Jaws, 25c; they make an old wrench as good as when you bought it.
"W. \& B." MACHINISTS' KNIFE HANDLE
WRENCHES
This wrench has the head and bar drop-forged in one piece from selected steel. The jaws are casehardened and the entire wrench is ground, polished and highly finished.

## APPLETON WOOD SAWS.

For over twenty years the manufacturers of these Wood Saws have set the standard in wood saw construction. Their thorough knowledge of the business enables them to keep abreast of all the modern requirements and to incorporate in the construction of the Appleton Saws every improvement demanded by present needs and approved by practical experience. The circular saw has to be run at a high rate of speed to do its work satisfactorily; therefore, the frame should be very strong and rigid and as simple in design as is compatible with efficiency, because a breakage when in operation would be dangerous to the operator. For the frames of our saws only the best material adapted to the purpose is used, the same being the proper weight to insure ample strength. For absolute rigidity these frames are strongly mortised and bolted together and firmly braced in every direction. There is no shape to an Appleton Wood Saw Frame. An ordi-
 on Appleton Saws is the best.

## THE COMMON SENSE TILTING TABLE WOOD SAW.

An old favorite, on account of its strength, durability and convenience. Very fast work can be done with it. Price, without Saw Blade.

## NEW STYLE TILTING TABLE POLE SAW.

The original frame of this style and the best Pole Saw on the market; embodies all the latest ideas; imitated by many but equalled by none; requires more power than Common Sense Saw.
Price, without Saw Blade. . . . . . . . . . . . . . . . . . . . . . . . . . . $\$ 30.00$
Price, with 24 -inch Saw ............................................ 38.00
Price, with $26-$-inch Saw ............................................... 39.00

## APPIETON EXTENSION TABLE POIE SAW.

Built like Common Sense, but has 6 -foot table to left of blade instead of to right. A good light-power Pole Saw. Price, without Saw. Price, with 24 -inch Saw $\$ 25.00$
33.00 Price, with 26 -inch Saw

"American" Improved Variable Friction Feed Saw Mills.

## THE LIGHTEST RUNNING AND EASIEST TO SET UP

 AND OPERATE.The American Saw Mill is especially adapted to Gasoline Engine power and can be successfully run with a 7 or 9 H. P. Engine. We know of no other mill that will do this. Made in eight sizes and know of no other mill that wito-date. The No. 1 American Saw Mill and our 9 H . $\mathbf{P}$. Strictly up-to-date. The No. 1 American Saw Mill and our 9 H . P. Alamo Gasoline Engine make a nice outfit, and will cut 3,000 feet cular with opinions of many who know by experience that the American Saw Mills are all we claim for them.

## PRICES OF "OUR POPULAR FARM OUTFITS."

Outfit A-Consisting of "American" No. 1 Standard Saw Mill, with variable friction feed with 48 -in. Solid Tooth Saw. $\$ 225.00$ Outfit B-Consisting of "American" No. 1 Saw Mill, as described in Outfit A, also one $9-H$. P. Ideal Alamo Portable Gasoline Engine, complete with new cooling device, friction clutch pulley and 50 feet 6 -inch canvas belting ................. 650.00 Special Catalogue and Prices on Larger Sizes on Application.

## The American "Up-to-Date" Shingle Machine.

To meet the demand for a reliable yet low-priced Shingle Machine, suitable for small mills, farmers and others having light power, we have brought out our "UP-TO-DATE" Shingle Machine, shown in the accompanying cut. It ís thoroughly well made throughout of the best materials.

Power Feed is provided which is thrown into gear by pressure of the foot on the stirrup, and the machine can be used either with hand or power without change in adjustment.
A new feature, and a very valuable one, is the handy little edger, which has an 8 -inch saw and a convenient gauge, insuring square, straight-edge shingles. Capacity, 10,000 to 15,000 shingle per day.

The machine will handle square, round or split blocks and does not require an experienced operator.

Price complete, with edger, $\$ 85.00$. Price complete, without edger, $\$ 75.00$.

TILLEY LADDER HOOK.
Window Cleaners ne cout explains all 1ts merits and utility
$t \mathrm{t}$ can be quickly attached or detached.

Light, strong and stiff. Iron knees under ends of each step. These kenees pass entirely through the steps and side bars, holdind ladders firmly together and insuring a strong
brace to the steps. Pail rests on all sizes of 5 feet and over. Furnished in 6, 8, 10 and 12 foot lengths.

Strong, folds up closely, and weighs but 24 pounds. Is made of the best material. Is safe, and can be quickly adjusted to any window. Particularly useful for setting glass and painting sash.
Regular Size, 4 ft .4 in . board, Extra Size, $6 \mathrm{ft}$. board,

Improved Tilley Step Ladders.

Well adapted to any use to which step ladders are put. It has a special style of hinge, connecting front and back, bolted on, rodded, and well braced with iron. Some prefer the open back detached, as it admits of using a plank to make a platform

# GRIFFITH \& TURNER CO. $\frac{20}{\Omega}$ 

##  AND EXTENSION LADDER. <br> HE MATERIM USED

Norway pine for sides; rock elm or hickory for rungs; the very best grade of malleable iron castings for metal parts.
losed length, the rungs always being exactly opt up to nearly twice its lapped portion, no matter what the amount of opposite each other in the the bottoms apart, a reliable and convenient stepladder is obtained swinging can also be extended or closed, and for any use that a stepladder can be used are very desirable. All ladders over 24 feet in length are made in two long sections, with flared bottom, adding to the rigidity and reducing the slipping at bottom to a minimum. This ladder will come apart and each section can be used separately. This style can, of course, be extended or closed, but does not swing apart, forming a stepladder, as does the In orderin
In ordering, bear in mind that a certain amount has to be allowed for the "lap" When the ladder is in its most extended form, the amount of necessity increasing as the ladders increase in length, in order to obtain perfect safety and firmness. In lengths of 12 to 18 feet deduct one foot for lap-that is, a 12 -foot ladder would be 6 feet high when closed or would form a 6-foot stepladder, but would be only 11 feet long when extended. In lengths of 20 to 32 feet deduct 2 feet, and from 34 to 40 deduct three feet from the total length in same manner

G. \& T. Solid Steel and Tubular Steel Axle Two-Horse Wagons
These warons are all heavily ironed and braced, and for use in rough and hilly country they are specially adapted, being exceptionally strong. The wheels are dipped in Boiling Oil, and the round-edge tire is used for the protection of felloes and paint. They are one of the lightest running Wagons made. There is an increasing demand in sandy countries for steel-axle wagons, and our trade in this
style has grown immensely. The prices include Whiffetrees, Wrench, Stay Chains, Tongue Chains, Box. Top Box, Spring Seat and Gear. All Wagons will be arranged with Shafts for one horse instead of Tongue when ordered at same price.

\section*{PETER SCHUTTLER WAGON.}

There are several very valuable features in this wagon that are not found in others, viz: Osellating King Bolt, Axle Truss, Sand Guards and Stool Collar.
The Oscillating King Bolt prevents all twisting and wrenching of the box and load, and relieves the team when wheels pass over obstructions, adding to the life of the wagon.

The Axle Truss adds greatly to the strength of the axle and is held in place by a truss clip, which see in cut, and further strengthened by the Stool Col'ar, which clamps around Stool Colar, Which clamps around jottom of the axle truss, bringing weight of load nearer the wheels.
Another very valuable and necessary attachment is the Metal Sand Guard, consisting of a flat malleable iron ring clinched to the skein collar. It fits nicely within the hub band, which projects full width over it when wheel is in place, conseit when wheel is in place, consequently the skein bearings are renor sand.

\section*{With Patented Metal Sand Guards, Linch Pin, Steel Skeins}

PRICES ON SCHUTTLER GEARS.
\(3^{1 / 4}\) Steel Skein Gear only, with \(4 \times 5 / 8\) tires, truss axle and sand guards and \(11 / 4\) back-action side lever reversible brake. List. . .\$119.25. Retail... \$102.75.
\(31 / 2\) Steel Skein Gear only, complete as above, except with \(4 \times 3 / 4\) tire.
List, \$124.50. Retail, \$10z.35.
334 Steel Skein Gear only, complete as above, except \(4 \times 7 / 6\) tire and \(11 / 2\) brake.

List... \$152.00. Retail... \$131.00.
4 -inch Steel Skein Gear only, complete as \(33 / 4\)-inch, except \(4 \times 1\) tire.

\section*{STUDEBAKER JUNIOR.}

The Studebaker Junior is a substantially made miniature wagon not a mere toy. It is one of the finest and strongest wagons of its kind in the market, and is built after the style of the regular Studebaker-oak frame, farm wagon gearing with bent hounds and adjustable reach, all parts strongly ironed and braced, welded tires, staggered spokes, hub boxes and caps, oak shafts (or pole if desired), handsomely painted. Body is \(17 \times 36\), wheels \(12 \times 18\) inches. The Studebaker Junior is suitablefor use by the child alone or with a good sized dog, sheep or goat in the shafts. Price, \(\$ 9.00\).

\title{
BROWN WAGON
}

Axles are made of dried selected hickory. Brown's Patent Extension Chilled Skeins. These skeins support the axle where it has the greatest load to bear. Tongue Chains and Stay Chains fitted with springs. The Tongue Chains have a branch chain to prevent jerking and switching of the tongue and eases the draft on the horses' necks. Wheels all positively soaked in hot oil. Tires never get loose. Write for special circular fully describing these Wagons.

Coil springs are applied to tongue-eases draft on team's neck when chains are forced to control tongue or hold back. They supply the place of the vibrating neck yoke. Yield to pull of chain or branch chain, saving team from jerking of tongue. Branch chains are added to each tongue, practically destroying side jerking and whipping motion. Acts same as neck yoke.
